1 Removal and replacement

- Introduction
- Removal and replacement strategy
- Electrostatic discharge
- Required tools
- Service approach
- Removal and replacement procedures
Introduction

This chapter describes the removal and replacement of field-replaceable units (FRUs) only.

Replacing FRUs is generally the reverse of removal. Occasionally, notes and tips are included to provide directions for difficult or critical replacement procedures.

HP does not support repairing individual subassemblies or troubleshooting to the component level.

Note the length, diameter, color, type, and location of each screw. Be sure to return each screw to its original location during reassembly.

Incorrectly routed or loose wire harnesses can interfere with other internal components and can become damaged or broken. Frayed or pinched harness wires can be difficult to find. When replacing wire harnesses, always use the provided wire loops, lance points, or wire-harness guides and retainers.

Removal and replacement strategy

⚠️ **WARNING!** Turn the product off, wait 5 seconds, and then remove the power cord before attempting to service the product. If this warning is not followed, severe injury can result, in addition to damage to the product. The power must be on for certain functional checks during troubleshooting. However, disconnect the power supply during parts removal.

Never operate or service the product with the protective cover removed from the laser/scanner assembly. The reflected beam, although invisible, can damage your eyes.

The sheet-metal parts can have sharp edges. Be careful when handling sheet-metal parts.

⚠️ **CAUTION:** Do not bend or fold the flat flexible cables (FFCs) during removal or installation. Also, do not straighten pre-folds in the FFCs. You must fully seat all FFCs in their connectors. Failure to fully seat an FFC into a connector can cause a short circuit in a PCA.

📝 **NOTE:** To install a self-tapping screw, first turn it counterclockwise to align it with the existing thread pattern, and then carefully turn it clockwise to tighten. Do not overtighten. If a self-tapping screw-hole becomes stripped, repair the screw-hole or replace the affected assembly.

💡 **TIP:** For clarity, some photos in this chapter show components removed that would not be removed to service the product. If necessary, remove the components listed at the beginning of a procedure before proceeding to service the product.
Electrostatic discharge

CAUTION: Some parts are sensitive to electrostatic discharge (ESD). Look for the ESD reminder when removing product parts. Always perform service work at an ESD-protected workstation or mat, or use an ESD strap. If an ESD workstation, mat, or strap is not available, ground yourself by touching the sheet-metal chassis before touching an ESD-sensitive part.

Protect the ESD-sensitive parts by placing them in ESD pouches when they are out of the product.

Required tools

- #2 Phillips screwdriver with a magnetic tip and a 152-mm (6-in) shaft length
- Small flat-blade screwdriver
- Needle-nose pliers
- ESD mat or ESD strap (if one is available)
- Penlight (optional)

CAUTION: Always use a Phillips screwdriver (callout 1). Do not use a Pozidriv screwdriver (callout 2) or any motorized screwdriver. These can damage screws or screw threads.

Service approach

Before performing service

- Remove all paper from the product.
- Turn off the power using the power switch.
- Unplug the power cable and interface cable or cables.
- Place the product on an ESD workstation or mat, or use an ESD strap (if one is available). If an ESD workstation, mat, or strap is not available, ground yourself by touching the sheet-metal chassis before touching an ESD-sensitive part.
- Remove the print cartridge.
After performing service

- Plug in the power cable.
- Reinstall the print cartridge.
- Load paper in the product.

Post-service test

Perform the following test to verify that the repair or replacement was successful.

Print-quality test

1. Verify that you have completed the necessary reassembly steps.
2. Make sure that the tray contains clean, unmarked paper.
3. Attach the power cord and interface cable or interface cables, and then turn on the product.
4. Verify that the expected startup sounds occur.
5. Print a configuration page, and then verify that the expected printing sounds occur.
6. Print a demo page, and then verify that the print quality is as expected.
7. Send a print job from the host computer, and then verify that the output meets expectations.
8. Clean the outside of the product with a damp cloth.

Parts removal order

**NOTE:** In the following list, parts shown with blue text should be removed only in a clean-room environment. See the Service Manual Addendum for details about removing and replacing these parts.
Figure 1-2  Parts removal order: Scanner and document feeder

Automatic document feeder assembly

- ADF tray
- ADF top cover
  - ADF pre-pickup arm and roller
  - ADF outer cover
- ADF cable cover
- ADF core
- ADF roller post scan pinch
- Solar lock
- ADF base

Scanner assembly

- Control panel
- Engine left cover
- ADF floating hinge
- Scanner bezel (See the Service Manual Addendum)
- ADF floating hinge (Also can be removed before the Scanner bezel, tool needed)

Scan-drive system

- DC servo motor
- Scan bar

Scanner base

SSA hinge

Cartridge door arm
Figure 1-3  Parts removal order: Product base
Print cartridge
  Separation pad
  Pickup roller
  Transfer roller
  Printer side covers
    Fax card & formatter
    Cartridge door
    Front cover
    Laser Scanner
    Main Motor
  Top cover
    Duplex door
    Duplex frame
    Pickup ASSY
    Fuser
    Pickup solenoid
    Engine Controller PCA
  Duplex-reverse solenoid
  Main fan
  Duplexer-connector PCA
Removal and replacement procedures

NOTE: Many of the figures in the following procedures show the product with the scanner assembly removed. However, removal of the scanner assembly is necessary only when specified in the steps.

Print cartridge

1. Lift the scanner assembly, and then open the cartridge door.

   Figure 1-4 Remove the print cartridge (1 of 2)

2. Remove the print cartridge.

   Figure 1-5 Remove the print cartridge (2 of 2)
Pickup roller

⚠️ **CAUTION:** Do not touch the sponge portion of the roller. Skin oils can cause paper handling problems.

1. Remove the print cartridge. See Print cartridge on page 7.
2. Release the two tabs between the wheels and the sides of the pick up roller.

   **Figure 1-6** Remove the pickup roller (1 of 2)

3. Rotate the roller away from the product to remove it.

   **Figure 1-7** Remove the pickup roller (2 of 2)
Separation pad

⚠️ **CAUTION:** Do not touch the sponge portion of the pad. Skin oils can cause paper handling problems.

1. Place the product on its side to access the separation pad assembly.

⚠️ **CAUTION:** Do not scratch the product covers. Place the product on a cloth or other clean surface to avoid scratches from dirt and debris.

2. Remove two screws (callout 1), and then remove the separation pad assembly (callout 2).

**Figure 1-8** Remove the separation pad assembly
Transfer roller

⚠️ CAUTION: Do not touch the sponge portion of the roller. Skin oils can cause print quality problems.

1. Remove the print cartridge. See Print cartridge on page 7.
2. Release two tabs (callout 1), and then remove the transfer roller (callout 2).

Figure 1-9 Remove the transfer roller

Covers

Main tray

Open the tray, carefully flex the tray to release the hinges, and then remove the tray.

Figure 1-10 Remove the tray
Output bin extension

Lift the output bin extension (callout 1) up to remove it.

Figure 1-11  Remove the output bin extension
Left cover

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.

Remove the left cover

1. Remove one screw (callout 1).

   Figure 1-12 Remove the left cover (1 of 5)

2. Open the duplex door (callout 1), and then release two tabs (callout 2).

   Figure 1-13 Remove the left cover (2 of 5)
3. Release one tab (callout 1) at the bottom edge of the cover.

Figure 1-14  Remove the left cover (3 of 5)

4. Release one tab (callout 1).

Figure 1-15  Remove the left cover (4 of 5)
5. Rotate the back edge of the cover away from the product, and then remove the cover (callout 1).

**Figure 1-16** Remove the left cover (5 of 5)
Scanner assembly

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.

Remove the scanner assembly

1. Remove one screw (callout 1), and then disconnect three FFCs (callout 2).

   Figure 1-17  Remove the scanner assembly (1 of 5)

2. Remove two FFCs from the ferrite cores (callout 1).

   Figure 1-18  Remove the scanner assembly (2 of 5)
3. Remove the white FFC from its guide, and then carefully remove three FFCs from the upper guide (callout 1).

**Figure 1-19** Remove the scanner assembly (3 of 5)

4. Release the tabs inside the hinges (callout 1) to allow the scanner assembly to slide down on the hinges.

**Figure 1-20** Remove the scanner assembly (4 of 5)
5. Lift the scanner assembly up (arrow 1) and away from the hinges (arrow 2).

**Figure 1-21** Remove the scanner assembly (5 of 5)

---

### Scanner hinges

1. Remove the scanner assembly. See [Scanner assembly on page 15](#).
2. Remove one screw (callout 1) from each hinge.

**Figure 1-22** Remove the scanner hinges (1 of 2)
3. Lift each hinge up to remove it.

**Figure 1-23** Remove the scanner hinges (2 of 2)
Right cover

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.

Remove the right cover

1. Remove one screw (callout 1).
   
   Figure 1-24 Remove the right cover (1 of 5)

2. Open the duplex door (callout 1), and then release two tabs (callout 2).
   
   Figure 1-25 Remove the right cover (2 of 5)
3. Release one tab (callout 1) at the bottom edge of the cover.

**Figure 1-26** Remove the right cover (3 of 5)

4. Release one tab (callout 1) at the top of the right cover.

**Figure 1-27** Remove the right cover (4 of 5)
5. Pull the rear edge of the cover away from the product, slide the cover toward the front of the product to release it, and then remove the cover (callout 1).

Figure 1-28 Remove the right cover (5 of 5)
Duplex door

Open the duplex door (callout 1), release one of the hinges (callout 2) by pushing inward on the door retainer. Swing the door away from the product to release the second hinge, and then remove the door.

Figure 1-29  Remove the duplex door
Duplex frame

Before proceeding, remove the following components:

- Left cover. See Left cover on page 12.
- Right cover. See Right cover on page 19.
- Duplex door. See Duplex door on page 22.

Remove the duplex frame

1. Remove four screws (callout 1).

   Figure 1-30  Remove the duplex frame (1 of 2)

2. Release three tabs (callout 1), slide the duplex frame down (callout 2), and then remove the duplex frame.

   Figure 1-31  Remove the duplex frame (2 of 2)
Cartridge door

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.

Remove the cartridge door

⚠️ CAUTION: The cartridge door connecting arms can easily come apart once the cartridge door is removed. Do not lose the cartridge door arms while servicing the product.

1. Open the cartridge door, and then squeeze together the tabs (callout 1) on the right side link arm (callout 2).

   Figure 1-32 Remove the cartridge door (1 of 5)
2. Squeeze together the tabs (callout 1) on the cartridge door open indicator arm (callout 2) to release it from the door.

Figure 1-33 Remove the cartridge door (2 of 5)

3. Squeeze together the tabs (callout 1) on the left side link arm (callout 2) to release it from the door.

Figure 1-34 Remove the cartridge door (3 of 5)
4. Squeeze together the tabs (callout 1) on the cartridge door lift arm (callout 2) to release it from the door.

Figure 1-35 Remove the cartridge door (4 of 5)

5. Lift the cartridge door straight up (callout 1), and then remove it.

Figure 1-36 Remove the cartridge door (5 of 5)
Front cover

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Right cover. See Right cover on page 19.

Remove the front cover

▲ Release two tabs (callout 1), and then pull the bottom edge of the front cover (callout 2) away from the product to remove it.

Figure 1-37 Remove the front cover
Upper cover

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Right cover. See Right cover on page 19.
- Scanner assembly. See Scanner assembly on page 15.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.

Remove the upper cover

▲ Remove four screws (callout 1), and then remove the upper cover (callout 2).

⚠️ CAUTION: Do not lose the cartridge door arms while servicing the product. The cartridge door connecting arms can easily come apart once the cartridge door is removed.

Figure 1-38 Remove the upper cover
Main assemblies

Formatter PCA

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.

Remove the formatter PCA

1. Disconnect three FFCs (callout 1).

Figure 1-39 Remove the formatter PCA (1 of 2)
2. Remove five screws (callout 1), disconnect one connector (callout 2), disconnect two FFCs (callout 3), and then remove the formatter PCA.

Figure 1-40 Remove the formatter PCA (2 of 2)
Fax PCA

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.

Remove the fax PCA

▲ Remove one FFC (callout 1), remove four screws (callout 2), and then remove the fax PCA.

Figure 1-41 Remove the fax PCA
Laser scanner assembly

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Right cover. See Right cover on page 19.
- Front cover. See Front cover on page 27.
- Cartridge door. See Cartridge door on page 24.
- Upper cover. See Upper cover on page 28.

Remove the laser scanner assembly

1. Release one tab (callout 1), and then slide the holder (callout 2) forward to remove it.

Figure 1-42  Remove the laser scanner assembly (1 of 5)
2. Remove four screws (callout 1), and then remove the laser scanner cover (callout 2) and the sheet-metal plate (callout 3) together.

⚠️ **CAUTION:** The laser scanner cover (callout 2) and sheet-metal plate (callout 3) can be easily separated. Do not lose the plate while servicing the product.

💡 **TIP:** When the cover is reinstalled, make sure that the black screws (callout 4) are installed in the correct holes.

![Figure 1-43 Remove the laser scanner assembly (2 of 5)](image1)

3. Disconnect one FFC (callout 1), and then remove four screws (callout 2).

![Figure 1-44 Remove the laser scanner assembly (3 of 5)](image2)
4. Slide the laser scanner assembly to the left, and then remove the dust-proof sponge (callout 1).

Figure 1-45 Remove the laser scanner assembly (4 of 5)

5. Disconnect one connector (callout 1), and then remove the laser scanner assembly (callout 2).

Figure 1-46 Remove the laser scanner assembly (5 of 5)
Reinstall the laser scanner assembly

▲ When the holder is reinstalled (callout 1), make sure that the lever arm (callout 2) is correctly positioned in the slot in the holder.

Figure 1-47 Reinstall the laser scanner assembly
Pickup assembly

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Formatter PCA. See Formatter PCA on page 29.
- Fax modem. See Fax PCA on page 31.
- Right cover. See Right cover on page 19.
- Duplex frame. See Duplex frame on page 23.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the pickup assembly

1. Release two tabs (callout 1), and then remove the duplex reverse guide (callout 2).

Figure 1-48 Remove the pickup assembly (1 of 9)
2. Remove two screws (callout 1), and then remove the sheet metal corner brace (callout 2).

Figure 1-49 Remove the pickup assembly (2 of 9)

3. Disconnect one connector (callout 1), remove the wire harness from the guides (callout 2), and then remove five screws (callout 3).

NOTE: The connector in callout 1 is the lower of the two connectors in this area. The rightmost screw in callout 3 is on the front of the product.

Figure 1-50 Remove the pickup assembly (3 of 9)
4. Disconnect one connector (callout 1), and then release the wire harness (callout 2) from the guides (callout 3).

Figure 1-51 Remove the pickup assembly (4 of 9)

5. Disconnect three connectors (callout 1), and then remove the wire harness (callout 2) from the guide (callout 3).

*Reinstallation tip*  When installing the pickup assembly, place these wire harnesses (callout 2) in the guide first, and then place the wire harness from the ground connector in the previous step. This ensures that the harnesses are long enough to reach the engine controller PCA connectors.

Figure 1-52 Remove the pickup assembly (5 of 9)
6. Remove one bushing (callout 1) by releasing the tab and rotating the bushing counter-clockwise.

Figure 1-53 Remove the pickup assembly (6 of 9)

7. Remove one screw with a star washer (callout 1).

Figure 1-54 Remove the pickup assembly (7 of 9)
8. Remove six screws (callout 1), and then remove the pickup assembly (callout 2).

⚠️ **CAUTION:** The ground spring on the assembly is not captive. Do not lose the spring when removing the assembly. See Reinstall the pickup assembly on page 41.

Figure 1-55 Remove the pickup assembly (8 of 9)

9. Remove one gear (callout 1) from the pickup assembly (callout 2).

⚠️ **CAUTION:** The gear is not captive. Do not lose the gear while servicing the product.

Figure 1-56 Remove the pickup assembly (9 of 9)
Reinstall the pickup assembly

1. Make sure that the pickup assembly ground spring is positioned correctly when reinstalling the assembly.

Figure 1-57 Reinstall the pickup assembly (1 of 4; correct ground spring position)

Figure 1-58 Reinstall the pickup assembly (2 of 4; incorrect ground spring position)
2. Push down the lift plate before installing the pickup assembly.

**TIP:** Reach in from the front of the product to push and hold down the lift plate while installing the pickup unit.

**Figure 1-59** Reinstall the pickup assembly (3 of 4; lift plate in raised position)

**Figure 1-60** Reinstall the pickup assembly (4 of 4; lift plate in lowered position)
Fuser

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Formatter PCA. See Formatter PCA on page 29.
- Fax modem. See Fax PCA on page 31.
- Right cover. See Right cover on page 19.
- Duplex frame. See Duplex frame on page 23.
- Front cover. See Front cover on page 27.
- Cartridge door. See Cartridge door on page 24.
- Upper cover. See Upper cover on page 28.

Remove the fuser

1. Release two tabs (callout 1), and then remove the duplex reverse guide (callout 2).

Figure 1-61  Remove the fuser (1 of 9)
2. Remove two screws (callout 1), and then remove the sheet-metal corner brace (callout 2).

Figure 1-62 Remove the fuser (2 of 9)

3. Disconnect one connector (callout 1), remove one wire harness from the guide (callout 2), and then remove five screws (callout 3) to remove the sheet metal plate.

Figure 1-63 Remove the fuser (3 of 9)
4. Disconnect one connector (callout 1), and then release the wire harness (callout 2) from the guides (callout 3).

**Figure 1-64** Remove the fuser (4 of 9)

5. Disconnect four connectors (callout 1), and then release the wire harnesses (callout 2) from the guide (callout 3).

**Figure 1-65** Remove the fuser (5 of 9)
6. Disconnect one tab (callout 1), and then remove the guide (callout 2).

Figure 1-66  Remove the fuser (6 of 9)

7. Release the wire harnesses (callout 1) from the guide (callout 2).

Figure 1-67  Remove the fuser (7 of 9)
8. Remove two screws (callout 1), remove the sheet metal brace (callout 2), and then remove one bushing (callout 3) by releasing the tab and rotating the bushing clockwise.

Figure 1-68  Remove the fuser (8 of 9)

9. Remove three screws (callout 1), and then remove the fuser (callout 2).

Figure 1-69  Remove the fuser (9 of 9)
Reinstall the fuser

To avoid damage to the wire harnesses, make sure that they are installed correctly.

**Figure 1-70** Reinstall the fuser (1 of 2); correct wire harness installation

**Figure 1-71** Reinstall the fuser (2 of 2); incorrect wire harness installation

**NOTE:** Also make sure the gears are meshed correctly before tightening the screws.
Main motor

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Right cover. See Right cover on page 19.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the main motor

1. Release one tab (callout 1), and then slide the holder forward (callout 2), and lift it up to remove it.

Figure 1-72 Remove the main motor (1 of 9)
2. Remove four screws (callout 1), and then remove the laser scanner cover (callout 2) and the sheet-metal plate (callout 3).

**NOTE:** The laser scanner cover and plate are removed as one assembly.

**TIP:** Make sure that the black screws (callout 4) are installed in the correct holes when reinstalling the laser scanner cover.

![Figure 1-73 Remove the main motor (2 of 9)](image1)

3. Disconnect three connectors (callout 1 and callout 2).

![Figure 1-74 Remove the main motor (3 of 9)](image2)
4. Release two tabs (callout 1), and then slightly separate the motor driver PCA (callout 2) from the product.

\[\text{CAUTION:}\] The motor driver PCA is still connected to the product by the wire harnesses and an FFC.

**Figure 1-75** Remove the main motor (4 of 9)

5. **Duplex models only:** Release one tab (callout 1), and then remove the duplex connector PCA (callout 2).

**Figure 1-76** Remove the main motor (5 of 9)
6. Disconnect two connectors (callout 1), and then carefully set the PCA out of the way.

⚠️ **CAUTION:** Do not damage the FFC that is attached to the PCA.

**Figure 1-77** Remove the main motor (6 of 9)

7. Release the wire harness (callout 1) from the guide (callout 2).

**Figure 1-78** Remove the main motor (7 of 9)
8. Remove one screw (callout 1), and then remove the motor cover (callout 2).

Figure 1-79  Remove the main motor (8 of 9)

9. Remove two screws (callout 1), and then remove the motor (callout 2).

Figure 1-80  Remove the main motor (9 of 9)
Reinstall the main motor drive belt

▲ When the main motor is reinstalled, make sure that the drive belt (callout 1) is positioned correctly over the tensioner roller (callout 2).

Figure 1-81 Main motor drive belt installed correctly

Figure 1-82 Main motor drive belt installed incorrectly
Pickup solenoid

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Formatter PCA. See Formatter PCA on page 29.
- Fax modem. See Fax PCA on page 31.
- Right cover. See Right cover on page 19.
- Duplex frame. See Duplex frame on page 23.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the pickup solenoid

1. Release two tabs (callout 1), and then remove the duplex reverse guide (callout 2).

Figure 1-83  Remove the pickup solenoid (1 of 6)
2. Remove two screws (callout 1), and then remove the sheet-metal corner brace (callout 2).

Figure 1-84 Remove the pickup solenoid (2 of 6)

3. Disconnect one connector (callout 1), remove one wire harness from the guide (callout 2), and then remove five screws (callout 3) to remove the sheet metal plate.

Figure 1-85 Remove the pickup solenoid (3 of 6)
4. Disconnect one connector (callout 1), and then remove the wire harness (callout 2) from the guide (callout 3).

**NOTE:** Callout 1 indicates three connectors. Disconnect the one that is furthest to the left (J562).

*Figure 1-86 Remove the pickup solenoid (4 of 6)*

5. Release the wire harness (callout 1) from the guide (callout 2).

*Figure 1-87 Remove the pickup solenoid (5 of 6)*
6. Remove one screw (callout 1), and then remove the pickup solenoid (callout 2).

Figure 1-88 Remove the pickup solenoid (6 of 6)
Engine controller PCA

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Formatter PCA. See Formatter PCA on page 29.
- Fax modem. See Fax PCA on page 31.
- Right cover. See Right cover on page 19.
- Duplex frame. See Duplex frame on page 23.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the engine controller PCA

1. Release two tabs (callout 1), and then remove the duplex reverse guide (callout 2).

Figure 1-89 Remove the engine controller PCA (1 of 9)
2. Remove two screws (callout 1), and then remove the sheet-metal corner brace (callout 2).

   Figure 1-90  Remove the engine controller PCA (2 of 9)

3. Disconnect one connector (callout 1), remove one wire harness from the guide, (callout 2), and then remove five screws (callout 3) to remove the sheet metal plate.

   Figure 1-91  Remove the engine controller PCA (3 of 9)
4. Disconnect one connector (callout 1), and then release the wire harness (callout 2) from the guides (callout 3).

Figure 1-92  Remove the engine controller PCA (4 of 9)

5. Disconnect four connectors (callout 1), and then remove the wire harnesses (callout 2) from the guide (callout 3).

Figure 1-93  Remove the engine controller PCA (5 of 9)
6. Release the wire harness (callout 1) from the ground spring (callout 2).

Figure 1-94 Remove the engine controller PCA (6 of 9)

7. Disconnect two connectors (callout 1) and two FFCs (callout 2).

Figure 1-95 Remove the engine controller PCA (7 of 9)
8. Remove one screw with star washer (callout 1), and then remove one more screw (callout 2).

*Figure 1-96  Remove the engine controller PCA (8 of 9)*

9. Remove three screws with washers (callout 1), and then remove the engine controller PCA (callout 2).

*Figure 1-97  Remove the engine controller PCA (9 of 9)*
Reinstall the engine controller PCA

NOTE: To install the transfer wire harness correctly, follow these steps in addition to the steps in reverse order of removal.

1. Place the engine controller PCA into the product so that the cartridge door switch lever (callout 1) engages correctly with the switch on the PCA (callout 2).

   Figure 1-98 Reinstall the engine controller PCA (1 of 5)

2. Set the ground spring (callout 1) on the transfer wire harness (callout 2).

   Figure 1-99 Reinstall the engine controller PCA (2 of 5)
3. Position the transfer wire harness (callout 1) in the guide (callout 2).

Figure 1-100 Reinstall the engine controller PCA (3 of 5)

4. Connect one connector (callout 1).

Figure 1-101 Reinstall the engine controller PCA (4 of 5)
5. Position the transfer wire harness (callout 1) in the guides (callout 2).

Figure 1-102 Reinstall the engine controller PCA (5 of 5)
Duplex reverse solenoid

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Right cover. See Right cover on page 19.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the duplex reverse solenoid

1. Release one tab (callout 1), and then remove the holder (callout 2).

Figure 1-103  Remove the duplex reverse solenoid (1 of 5)
2. Remove four screws (callout 1), and then remove the laser scanner cover (callout 2) and the sheet metal plate (callout 3).

**NOTE:** The laser scanner cover and plate are removed as one assembly.

**TIP:** When installing the laser scanner cover, make sure that the black screws (callout 4) are in the correct holes.

![Figure 1-104 Remove the duplex reverse solenoid (2 of 5)](image1)

3. Disconnect two connectors (callout 1), and then release the wire harness (callout 2) from the guides (callout 3).

![Figure 1-105 Remove the duplex reverse solenoid (3 of 5)](image2)
4. Release one tab (callout 1), and then rotate the cable guide forward to remove it (callout 2).

Figure 1-106 Remove the duplex reverse solenoid (4 of 5)

5. Remove one screw (callout 1), and then remove the duplex reverse solenoid (callout 2).

Figure 1-107 Remove the duplex reverse solenoid (5 of 5)
Main fan

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Right cover. See Right cover on page 19.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the main fan

1. Release one tab (callout 1), and then remove the holder (callout 2).

**Figure 1-108** Remove the main fan (1 of 5)
2. Remove four screws (callout 1), and then remove the laser scanner cover (callout 2) and the sheet-metal plate (callout 3).

**NOTE:** The laser scanner cover and plate are removed as one assembly.

**TIP:** When installing the laser scanner cover, make sure that the black screws (callout 4) are in the correct holes.

Figure 1-109 Remove the main fan (2 of 5)

3. Disconnect one connector (callout 1), and then release the wire harness (callout 2) from the guides (callout 3).

Figure 1-110 Remove the main fan (3 of 5)
4. Release two tabs (callout 1), and then remove the fan cover (callout 2).

Figure 1-111  Remove the main fan (4 of 5)

5. Release two tabs (callout 1), and then remove the main fan (callout 2).

Figure 1-112  Remove the main fan (5 of 5)
Reinstall the main fan

When the main fan is reinstalled, make sure that the wire harness (callout 1) is correctly positioned, and that the label (callout 2) on the fan faces the inside of the product.

Figure 1-113  Reinstall the main fan
Duplex connector PCA

Before proceeding, remove the following components:

- Main tray. See Main tray on page 10.
- Output bin extension. See Output bin extension on page 11.
- Left cover. See Left cover on page 12.
- Scanner assembly. See Scanner assembly on page 15.
- Right cover. See Right cover on page 19.
- Cartridge door. See Cartridge door on page 24.
- Front cover. See Front cover on page 27.
- Upper cover. See Upper cover on page 28.

Remove the duplex connector PCA

1. Release one tab (callout 1), and then remove the holder (callout 2).

Figure 1-114 Remove the duplex connector PCA (1 of 5)
2. Remove four screws (callout 1), and then remove the laser scanner cover (callout 2) and the sheet-metal plate (callout 3).

**NOTE:** The laser scanner cover and plate are removed as one assembly.

**TIP:** When installing the laser scanner cover, make sure that the black screws (callout 4) are in the correct holes.

**Figure 1-115** Remove the duplex connector PCA (2 of 5)

3. Disconnect three connectors (callout 1)

**Figure 1-116** Remove the duplex connector PCA (3 of 5)
4. Release two tabs (callout 1), and then slightly separate the motor driver PCA (callout 2) from the product.

⚠ **CAUTION:** Do not damage the FFC and the connectors that are still connected to the motor driver PCA.

![Figure 1-117 Remove the duplex connector PCA (4 of 5)](image1)

5. Release one tab (callout 1), and then remove the duplex connector PCA (callout 2).

![Figure 1-118 Remove the duplex connector PCA (5 of 5)](image2)
Scanner components

NOTE: This section describes replacement and removal of individual scanner components. To remove the complete scanner assembly, see Scanner assembly on page 15.

Document feeder input tray

1. Open the document feeder cover.

Figure 1-119 Remove the document feeder input tray (1 of 2)

2. Hold the scanner cover down, and then pull up on the document feeder tray to release two tabs, lift the document feeder tray up, and then remove it.

Figure 1-120 Remove the document feeder input tray (2 of 2)
Document feeder cover

1. Open the document feeder cover.

   Figure 1-121  Remove the document feeder cover (1 of 3)

2. Release one tab (callout 1), and then fully open the document feeder cover.

   Figure 1-122  Remove the document feeder cover (2 of 3)
3. Release the hinges (callout 1), and then remove the document feeder cover.

Figure 1-123 Remove the document feeder cover (3 of 3)
Document feeder pick arm assembly

Before proceeding, remove the following components:

- Document feeder tray. See Document feeder input tray on page 77.
- Document feeder cover. See Document feeder cover on page 78.

Remove the document feeder pick arm assembly

1. Release two tabs (callout 1) on each end of the inner cover (for a total of four tabs), and then lift the inner cover out of the outer cover.

   Figure 1-124 Remove the document feeder pick arm assembly (1 of 4)

2. Remove the pick extension shaft (callout 1).

   Figure 1-125 Remove the document feeder pick arm assembly (2 of 4)
3. Release one tab (callout 1).

Figure 1-126 Remove the document feeder pick arm assembly (3 of 4)

4. Disconnect the spring that is underneath the pick arm assembly (callout 1), and then rotate the pick arm assembly to remove it (callout 2).

Figure 1-127 Remove the document feeder pick arm assembly (4 of 4)
Document feeder core assembly

Before proceeding, remove the following components:

- Document feeder tray. See Document feeder input tray on page 77.
- Document feeder cover. See Document feeder cover on page 78.

Remove the document feeder core assembly

1. Release one tab (callout 1), and then remove the document feeder cable cover (callout 2).

Figure 1-128 Remove the document feeder core assembly (1 of 3)
2. Remove one FFC using the blue tab (callout 1).

   \textbf{Figure 1-129} Remove the document feeder core assembly (2 of 3)

\textit{TIP:} The orientation of the FFC is important. When reinstalling it, make sure the blue tab is toward the product right side. If the FFC is installed upside-down, the document feeder does not work.

3. Release one hinge (callout 1), and then remove the document feeder core assembly.

   \textbf{Figure 1-130} Remove the document feeder core assembly (3 of 3)
Post scan pinch rollers

Before proceeding, remove the following components:

- Document feeder tray. See Document feeder input tray on page 77.
- Document feeder cover. See Document feeder cover on page 78.
- Document feeder core. See Document feeder core assembly on page 82.

Remove the post scan pinch rollers

▲ Remove the post scan pinch rollers (callout 1).

Figure 1-131 Remove the post scan pinch rollers
Document feeder base assembly

Before proceeding, remove the following components:

- Document feeder tray. See Document feeder input tray on page 77.
- Document feeder cover. See Document feeder cover on page 78.
- Document feeder core. See Document feeder core assembly on page 82.

Remove the document feeder base assembly

1. Release the adhesive FFC protector on the document feeder base (callout 1).

TIP: Use two-sided tape to replace the FFC protector during reassembly.

Figure 1-132  Remove the document feeder base assembly (1 of 3)
2. Pull forward on the center tab on one of the solar locks to release the lock (callout 1), and then pull the solar lock straight down to remove it (callout 2). Repeat the procedure for the other solar lock.

* TIP: The solar locks can be difficult to remove. You might need to use a small flat-blade screwdriver to gently pry the two side tabs in order to release the solar lock from the groove in the document feeder hinge.

---

Figure 1-133 Remove the document feeder base assembly (2 of 3)

3. Open the document feeder base, and then carefully remove it from the scanner assembly.

△ CAUTION: Do not damage the FFC (callout 1) that runs through the document feeder base. Carefully feed the FFC through the slot during removal and during replacement.

---

Figure 1-134 Remove the document feeder base assembly (3 of 3)
**Document feeder floating hinges**

**NOTE:** If you will be removing any scanner sub-assembly components in a clean-room environment, it is easier to remove the floating hinges after removing the scanner bezel. See the service manual addendum for the procedure.

Before proceeding, remove the following components:

- Document feeder tray. See Document feeder input tray on page 77.
- Document feeder cover. See Document feeder cover on page 78.
- Document feeder core assembly. See Document feeder core assembly on page 82.

Remove the document feeder floating hinges

▲ Insert a small flat-blade screwdriver along one side of the floating hinge. Rotate the screwdriver down to release the hook at the bottom of the floating hinge (callout 1), and then remove the hinge. Repeat the procedure for each hinge (callout 2).

*Figure 1-135  Remove the document feeder floating hinges*
Control panel

1. Remove three screws (callout 1).

   Figure 1-136 Remove the control panel (1 of 2)

2. Lift the control panel to access the FFC (callout 1), and then disconnect the FFC.

   Figure 1-137 Remove the control panel (2 of 2)
2 Solve problems

- Problem-solving checklist
- Menu map
- Troubleshooting process
- Tools for troubleshooting
- Paper feeds incorrectly or becomes jammed
- Improve print quality
- Clean the product
- The product does not print or it prints slowly
- Solve connectivity problems
- Service mode functions
- Solve fax problems
- Product updates
Problem-solving checklist

Follow these steps when trying to solve a problem with the product.

- **Step 1: Check that the product power is on**
- **Step 2: Check the control panel for error messages**
- **Step 3: Test print functionality**
- **Step 4: Test copy functionality**
- **Step 5: Test the fax sending functionality**
- **Step 6: Test the fax receiving functionality**
- **Step 7: Try sending a print job from a computer**

**Step 1: Check that the product power is on**

1. Make sure that the product is plugged in and turned on.
2. Make sure that the power button light illuminates. If it does not illuminate, perform the following checks:
   a. Make sure that the power cable is connected to the product and to the outlet.
   b. Check the power source by connecting the power cable to a different outlet.
3. Make sure that the print cartridge is installed correctly and that all doors are closed. The control panel displays messages to indicate issues with doors open and with the print cartridge connections.
4. If the document feeder motor does not rotate, open the document feeder cover, and then remove any packing material or shipping tape.
5. If the scanner bulb does not light, check the scanner assembly FFC connections on the formatter PCA. If the scanner bulb still does not light, replace the scanner drive assembly in an approved clean room.

**Step 2: Check the control panel for error messages**

The control panel indicates ready status under normal conditions. If an error message appears, resolve the error.

**Step 3: Test print functionality**

1. Open the Reports menu, and then select Config Report to print the report.
2. If the report does not print, check the following:
3. Make sure that paper is in the tray.
4. Check the control panel for paper jam messages. If the control panel indicates a jam, clear the jam.
5. Make sure that the print cartridge is not empty.
6. Clean the paper pick roller and the separation pad.
7. Replace the paper pick roller or the separation pad.

**Step 4: Test copy functionality**

1. Place the configuration page into the document feeder, adjust the paper guides, and then make a copy. If paper does not feed through the document feeder smoothly, replace the document feeder pick up arm assembly. If this does not improve the issue, replace the document feeder core assembly.
2. Place the configuration page onto the scanner glass, and then make a copy.
3. If the print quality on the copied pages is not acceptable, clean the scanner glass.

**Step 5: Test the fax sending functionality**

1. Press the Start Fax button on the control panel.
2. Listen for a dial tone.
3. If you do not hear a dial tone, check the telephone connection and the telephone signal source.
4. If the telephone line and the telephone signal source are functional, and you still do not hear a dial tone, check the fax modem FFC.
5. If the fax modem is not operating correctly, replace it.

**Step 6: Test the fax receiving functionality**

1. Use another fax machine to send a fax to the product.
2. If the product does not receive the fax, make sure that you do not have too many telephone devices connected to the product and that all telephone devices are connected in the correct order.
3. Review and re-configure the fax settings.
4. Turn off the Private Receive feature.
5. Check the PBX Ring Detect setting in the control panel secondary service menu.

**Step 7: Try sending a print job from a computer**

1. Use a word processing program to send a print job to the product.
2. If the print job does not print, make sure the program selects the correct printer driver.
3. Reinstall the product software.
4. Make sure that the product is connected correctly to the computer. Check the USB cable or the network connection. Make sure that the product is correctly configured to connect to the network, if applicable.
Menu map

You can print a Menu Structure report, which shows the control panel menus and available settings.

1. Press the Setup \button.
2. Use the arrow buttons to select the Reports menu, and then press OK.
3. Use the arrow buttons to select Menu Structure, and then press OK.
## Troubleshooting process

### Determine the problem source

The following table includes basic questions to ask the customer to quickly help define the problem or problems.

<table>
<thead>
<tr>
<th>General topic</th>
<th>Questions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Environment</strong></td>
<td>- Is the product installed on a solid, level surface (± 1°)?</td>
</tr>
<tr>
<td></td>
<td>- Is the power supply voltage within ± 10 volts of the specified power source?</td>
</tr>
<tr>
<td></td>
<td>- Is the power supply cord inserted all the way into the product connector and the wall outlet?</td>
</tr>
<tr>
<td></td>
<td>- Is the operating environment within specified parameters?</td>
</tr>
<tr>
<td></td>
<td>- Is the product exposed to ammonia gas, such as that produced by diazo copiers or office cleaning materials?</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Diazo copiers produce ammonia gas as part of the copying processes. Ammonia gas (from cleaning supplies or from diazo copiers) can have an adverse affect on some product components (for example, the print-cartridge OPC).</td>
</tr>
<tr>
<td></td>
<td>- Is the product exposed to direct sunlight?</td>
</tr>
<tr>
<td><strong>Paper</strong></td>
<td>- Does the customer use only supported paper?</td>
</tr>
<tr>
<td></td>
<td>- Is the paper in good condition (no curls, folds, or distortion)?</td>
</tr>
<tr>
<td></td>
<td>- Is the paper stored correctly and within specified environmental limits?</td>
</tr>
<tr>
<td><strong>Input trays</strong></td>
<td>- Is the amount of paper in the tray within specifications?</td>
</tr>
<tr>
<td></td>
<td>- Is the paper placed in the tray correctly?</td>
</tr>
<tr>
<td></td>
<td>- Are the paper guides aligned with the stack?</td>
</tr>
<tr>
<td><strong>Print cartridge</strong></td>
<td>- Is the print cartridge installed correctly?</td>
</tr>
<tr>
<td><strong>Transfer roller and fuser</strong></td>
<td>- Are the transfer roller and the fuser installed correctly?</td>
</tr>
<tr>
<td><strong>Print-cartridge door and duplex door</strong> (duplex models only)</td>
<td>- Is the print cartridge door or the duplex door closed?</td>
</tr>
<tr>
<td><strong>Condensation</strong></td>
<td>- Does condensation occur following a temperature change (particularly in winter following storage in cold temperatures)? If so, wipe affected parts dry, or leave the product on for 10 to 20 minutes.</td>
</tr>
<tr>
<td></td>
<td>- Was the print cartridge opened soon after being moved from a cold place to a warm place? If so, allow the print cartridge to sit at room temperature for 1 to 2 hours.</td>
</tr>
<tr>
<td><strong>Miscellaneous</strong></td>
<td>- Check for and remove any non-HP components (for example, a print cartridge) from the product.</td>
</tr>
<tr>
<td></td>
<td>- Disconnect the product from the network, and then make sure that the failure is with the product before continuing troubleshooting.</td>
</tr>
</tbody>
</table>
Power subsystem

Power-on checks

Turn on the product. If the control panel LEDs do not illuminate, perform the power on checks to find the cause of the problem.

1. Verify that the product is plugged into an active electrical outlet that delivers the correct voltage.
2. Verify that the power button is in the on position.
3. Make sure that the product makes the expected sounds during startup.

NOTE: Make sure that the overcurrent/overvoltage protection circuit is not activated in the low voltage power supply. Turn the product off, disconnect the power cord, wait a few seconds, reconnect the power cord, and then turn the product on. If the product does not function, the fuse melts, or the power supply is malfunctioning, replace the engine controller PCA. See Engine controller PCA on page 59.
Tools for troubleshooting

Individual component diagnostics

Engine diagnostics

Print engine test pages to help determine whether the product and the formatter are functioning. If the formatter is damaged, it can interfere with the engine test. If the engine test page does not print, try removing the formatter, and then perform the engine test again. If the engine test is successful, the problem is likely with the formatter.

**NOTE:** Information pages also help solve product issues. See the product user guide for information about printing information pages.

Engine test button

**NOTE:** The product has a firmware engine test button that is activated by opening and closing the print-cartridge door in a specific pattern.

Perform an engine test

1. Make sure that paper is loaded correctly in the tray.
2. Make sure that the output bin extension is in the open position.
3. Turn the product on. Wait for the product to reach the ready state.
4. Open, and then close the print cartridge door five times at an interval of about two seconds to activate the internal engine test button.
5. If the engine test is successful, an engine test page prints with a series of horizontal lines across the page.

*Figure 2-1 Sample engine test page*
Components tests

Drum rotation functional check

The photosensitive drum located in the print cartridge must rotate for the print process to work. The photosensitive drum receives its drive from the main drive motor.

NOTE: This test is especially important if refilled print cartridges have been used.

1. Open the print cartridge door.
2. Remove the print cartridge.
3. Mark the drive gear on the cartridge with a felt tipped marker. Note the position of the mark.
4. Replace the print cartridge, and then close the print cartridge door. The startup sequence should rotate the drum enough to move the mark.
5. Open the print cartridge door, and then verify that the marked gear moved.

If the mark did not move, inspect the main drive assembly to make sure that it meshes with the print cartridge gears. If the drive gears appear functional, and the drum does not move, replace the print cartridge.

Half self-test functional check

The half self-test functional check determines which printing process is malfunctioning.

1. Print a configuration page.
2. Open the print cartridge door after the paper advances halfway through the product (about five seconds after the motor begins to rotate). The leading edge of the paper should have advanced past the print cartridge.
3. Remove the print cartridge.
4. Open the print cartridge drum shield to view the drum surface. If a dark and distinct toner image is present on the drum surface, assume that the first two functions of the electrophotographic process are functioning (image formation and development). Troubleshoot the failure as a transfer roller or fusing issue.

If no image is on the photosensitive drum, perform these checks:

1. Make sure that the entire length of the sealing tape is removed from the print cartridge before you installed the cartridge.
2. Perform a drum rotation functional check to make sure that the drum rotates.
3. Make sure that the high-voltage contacts are clean and not damaged.

Figure 2-10 Circuit diagram
HP ToolboxFX

HP ToolboxFX is a software program that you can use to complete the following tasks:

● Check the product status
● Configure the product settings
● View troubleshooting information
● View online documentation

You can view HP ToolboxFX when the product is connected to a computer directly via USB or via a network. You must perform the recommended full software installation to use HP ToolboxFX.

View HP ToolboxFX

Open HP ToolboxFX in one of these ways:

● Double-click the HP ToolboxFX icon in the Windows system tray or on the desktop.
● On the Windows Start menu, click Programs (or All Programs in Windows XP), click HP, click HP LaserJet Pro M1530 MFP Series, and then click HP ToolboxFX.

Status

The HP ToolboxFX Status tab contains links to the following main pages:

● Device Status. View product status information. This page indicates product conditions such as a jam or an empty tray. After you correct a problem with the product, click Refresh status to update the product status.

● Supplies Status. View detailed supplies information such as the estimated percent of life remaining in the print cartridge and the number of pages that have been printed with the current print cartridge. This page also has links to order supplies and to find recycling information.

● Device Configuration. View a detailed description of the current product configuration, including the amount of memory installed and whether optional trays are installed.

● Network Summary. View a detailed description of the current network configuration, including the IP address and network status.

● Print Info Pages. Print the configuration page and various other information pages that are available for the product, such as the supplies status page and the demo page.

● Event Log. View a history of product errors. The most recent error is at the top of the list.

Event log

The event log is a table where the product events are logged for your reference. The log contains codes that correspond to the error messages that appear on the product control-panel display. The number in the Page Count column specifies the total number of pages that the product had printed when the error occurred. The event log also contains a brief description of the error.
Fax

Use the HP ToolboxFX Fax tab to perform fax tasks from your computer. The Fax tab contains links to the following main pages:

- **Fax Tasks.** Set the fax receive mode.
- **Fax Phone Book.** Add, edit, or delete entries in the product phone book.
- **Fax Send Log.** View all of the recent faxes that have been sent from the product.
- **Fax Receive Log.** View all of the recent faxes that have been received by the product.
- **Block Faxes.** Add, delete, or view fax numbers that are blocked.

**Fax tasks**

The following three options are available when receiving a fax:

- **Print the fax.** You can also select an option to have a message appear on your computer to notifying you when the fax was printed.
- **Receive the fax on your computer.** You can also select an option to have a message appear on your computer to notifying you when the fax arrives. If the fax machine is connected to multiple computers, only one computer can be designated to receive faxes.
- **Forward the fax to another fax machine.**

**NOTE:** You must click the **Apply** button before the changes take effect.

**Fax phone book**

Use the HP ToolboxFX fax phone book to add and remove individuals or groups on your speed-dial list, import phone books from a variety of sources, and update and maintain the contact list.

- To add an individual contact to the speed-dial list, select the row of the speed dial number that you want to specify. Type the contact name in the **Contact name** window. Type the fax number in the **Fax number** window. Click **Add**.
- To add a group of contacts to the speed-dial list, select the row of the speed-dial number that you want to specify. Click **Add Group**. Double-click a contact name from the list on the left to move it to the group list on the right, or select a name on the left and then click the appropriate arrow to move it to the group list on the right. You can also use those two methods to move names from right to left. When you have created a group, type a name in the **Group name** window, and then click **OK**.
- To edit an existing individual speed-dial entry, click anywhere on the row containing the contact name to select it, and then click **Update**. Type changes in the appropriate windows, and then click **OK**.
- To edit an existing group-speed-dial entry, click anywhere on the row containing the group name to select it, and then click **Update**. Make any required changes, and then click **OK**.
- To delete an entry from the speed-dial list, select the item, and then click **Delete**.
- To move speed dial entries, select the entry and then click **Move**, or select **Move** and then specify the entry in the dialog box. Either select **Next empty row** or specify the number of the row where you want to move the entry.
**NOTE:** If you specify a row that is occupied, the new entry will overwrite the existing entry.

- To import contacts from a phone book that exists in Lotus Notes, Outlook, or Outlook Express, click **Import/Export Phone Book**. Select the **Import** option, and then click **Next**. Select the appropriate software program, navigate to the appropriate file, and then click **Finish**. To export contacts from a phone book, click **Import/Export Phone Book**. Select the **Export** option, and then click **Next**. Enter the file name or browse to the file to which you want to export contacts, and then click **Finish**. You can also select individual entries from the phone book instead of importing the entire phone book.

- To delete all entries, click **Delete All**, and then click **Yes**.

In addition to numerical digits, the following are valid characters for fax numbers:

- (  
- )  
- +  
- -  
- *  
- #  
- R  
- W  
- .  
- ,  
- <space>

**NOTE:** You must click **Apply** before the changes take effect.
Fax send log

The HP ToolboxFX fax send log lists all recently sent faxes and information about them, including date and time sent, job number, fax number, page count, and results.

Click any column heading in the fax send log to re-sort the information in that column in ascending or descending order.

The Results column provides the fax status. If the fax attempt was unsuccessful, this column provides a description of why the fax was not sent.

Fax receive log

The HP ToolboxFX fax receive log provides a list of all recently received faxes and information about them including the date and time received, job number, fax number, page count, results, and an abbreviated fax image.

The fax receive log can be used to block future faxes. Check the Block Fax box next to a received fax listed on the log.

When a computer that is connected to the product receives a fax, the fax contains a View link. Clicking this link opens a new page that provides information about the fax.

Click on any column heading in the fax receive log to re-sort the information in that column in ascending or descending order.

The Results column provides the fax status. If the fax attempt was unsuccessful, this column provides a description of why the fax was not received.

NOTE: You must click the Apply button before the changes take effect.

Block Faxes

Block Faxes provides a list of all numbers that are blocked. Add, modify, or delete blocked fax numbers on this tab.

Help

The HP ToolboxFX Documentation tab contains links to the following main pages:

- Troubleshooting
- Animated demonstrations
- User Guide. View information about the product usage, warranty, specifications, and support. The user guide is available in HTML and PDF formats.
System Settings

The HP ToolboxFX **System Settings** tab contains links to the following main pages:

- **Device Information.** View information about the product, such as the product description and a contact person.
- **Paper Handling.** Change the product paper handling settings, such as default paper size and default paper type.
- **Print Quality.** Change the product print quality settings.
- **Paper Types.** Change the product mode settings for each media type, such as letterhead, prepunched, or glossy paper.
- **System Setup.** Change the product system settings, such as product language and jam recovery.
- **Service.** Gain access to various procedures required to maintain the product.
- **Device Polling.** Change the product polling settings, which determine how often HP ToolboxFX collects data from the product.
- **Save/Restore Settings.** Save the current settings for the product to a file on the computer. Use this file to load the same settings onto another product or to restore these settings to this product at a later time.
- **Password.** Set, change, or clear the product security password.

**NOTE:** A single password can be set from the control panel, HP ToolboxFX, or the embedded Web server.

**Device information**

The HP ToolboxFX Device information page stores data about the product for future reference. The information that you type in these fields appears on the Configuration page. You can type any character in each of these fields.

**NOTE:** You must click the **Apply** button before the changes take effect.
Paper handling

Use the HP ToolboxFX paper-handling options to configure the default settings. These are the same options that are available on the product control-panel.

Three options are available for handling print jobs when the product is out of media:

- Select **Wait for paper to be loaded**.
- Select **Cancel** from the **Paper out action** drop-down list to cancel the print job.
- Select **Override** from the **Paper out time** drop-down list to send the print job to another paper tray.

The **Paper out time** field specifies how long the product waits before acting on the selections. You can specify from 0 to 3600 seconds.

**NOTE:** You must click the **Apply** button before the changes take effect.

Print quality

Use the HP ToolboxFX print-quality options to improve the appearance of print jobs. These are the same options that are available on the product control panel.

The four options provided for controlling print quality are resolution, REt (Resolution Enhancement technology), print density, and EconoMode.

- **Resolution.** Select 600 resolution for average print jobs and Fast Res 1200 for higher-quality print jobs.
- **REt.** You can turn on REt, which HP provides for improved print quality.
- **Print density.** For increased print density, select a higher number. For decreased print density, select a lower number.
- **EconoMode.** Turn EconoMode on when you are printing average print jobs. EconoMode is a feature that allows the product to use less toner per page. Selecting this option might extend the life of the toner supply and might reduce cost per page. However, it will also reduce print quality. The printed image is lighter, but it is adequate for printing drafts or proofs. HP does not recommend full-time use of EconoMode. If EconoMode is used full-time, it is possible that the toner supply will outlast the mechanical parts in the print cartridge. If print quality begins to degrade under these circumstances, you will need to install a new print cartridge, even if there is toner supply remaining in the cartridge.

**NOTE:** You must click the **Apply** button before the changes take effect.

Paper types

Use the HP ToolboxFX **Paper types** options to configure print modes that correspond to the various media types. Select **Restore Modes** to reset all modes to the factory settings.

**NOTE:** You must click the **Apply** button before the changes take effect.
System setup

Use the HP ToolboxFX system settings options to configure global settings for copy, fax, scan, and print, such as jam recovery and auto-continue.

NOTE: You must click the **Apply** button before the changes take effect.

Service

During the printing process, paper, toner and dust particles can accumulate inside the product. Over time, this buildup can cause print-quality problems such as toner specks or smearing. HP ToolboxFX provides an easy method for cleaning the paper path.

Device polling

You can turn off HP ToolboxFX device polling to reduce network traffic, but doing so also disables some HP ToolboxFX features: pop-up alerts, fax log updates, and the ability to receive faxes to this computer.

NOTE: You must click the **Apply** button before the changes take effect.

Print Settings

The HP ToolboxFX **Print Settings** tab contains links to the following main pages:

- **Printing**. Change the default product print settings, such as number of copies and paper orientation.
- **PCL5e**. View and change the PCL5 settings.
- **PostScript**. View and change the PS settings.

Printing

Use the HP ToolboxFX printing settings options to configure the settings for all print functions. These are the same options that are available on the product control panel.

NOTE: You must click the **Apply** button before the changes take effect.
**PCL 5e**

Use the PCL 5 options to configure the settings when you are using the PCL 5 print personality. These are the same options that are available on the PCL5 menu on the control panel.

**NOTE:** You must click the *Apply* button before the changes take effect.

**PostScript**

Use the PostScript option when you are using the HP postscript level 3 emulation print personality. When the **Print PostScript error** option is turned on, the PostScript error page automatically prints when HP postscript level 3 emulation errors occur.

**NOTE:** You must click the *Apply* button before the changes take effect.

**Network Settings**

The network administrator can use the HP ToolboxFX **Network Settings** tab to control the network-related settings for the product when it is connected to an IP-based network.
Internal print quality test pages

Print a cleaning page

Print a cleaning page to remove dust and excess toner from the paper path if you are having any of the following problems:

- Specks of toner on the printed pages.
- Toner smearing on the printed pages.
- Repeated marks on the printed pages.

Print a cleaning page:

1. On the control panel, press Setup.
2. Use the arrow buttons to select the Service menu.
3. Use the arrow buttons to select Cleaning Page.
4. Load plain letter or A4 paper when prompted.
5. Press OK to begin the cleaning process.

A page feeds through the product slowly. Discard the page when the process is completed.

Configuration page

The configuration page lists current product settings and properties. This page also contains a status log report.

1. On the control panel, press Setup.
2. Use the arrow buttons to select the Reports menu, and then press OK.
3. Use the arrow buttons to select Config Report, and then press OK.

A second page also prints showing the Fax Menu section, which provides details about the fax settings.
Print quality troubleshooting tools

Repetitive defect ruler

If the printed output shows a consistent, repetitive defect, then use the table in this section to determine which parts to replace based on the measured distance between the repetitions of the defect.

<table>
<thead>
<tr>
<th>Component</th>
<th>Distance between defects (mm)</th>
<th>Type of defects</th>
</tr>
</thead>
<tbody>

</table>
Interpret control panel messages

The majority of the control panel messages are to guide users through typical operations. The control panel messages indicate the status of the current operation and include a page count on the second line of the display where applicable. When the product receives fax data, print data, or scan commands, control panel messages indicate status. They also indicate alert messages, warning messages, and critical error messages that might require action from the user.

Control panel message types

Alert and warning messages appear temporarily and might require you to acknowledge the message by pressing OK to resume or press Cancel to cancel the job. With certain warnings, the job might not complete, or the print quality might be affected. If the alert or warning message is related to printing, and the auto-continue feature is on, the product will attempt to resume the print job after the warning has appeared for 10 seconds without acknowledgement.

Critical error messages can indicate some kind of failure. Turning the product off and then turning it on might fix the problem. If a critical error persists, the product might require service.

Paper feeds incorrectly or becomes jammed

The product does not pick up paper

If the product does not pick up paper from the tray, try these solutions.

1. Open the product and remove any jammed sheets of paper.
2. Load the tray with the correct size of paper for your job.
3. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.
4. Check the product control panel to see if the product is waiting for you to acknowledge a prompt to feed the paper manually. Load paper, and continue.

The product picks up multiple sheets of paper

If the product picks up multiple sheets of paper from the tray, try these solutions.

1. Remove the stack of paper from the tray and flex it, rotate it 180 degrees, and flip it over. Do not fan the paper. Return the stack of paper to the tray.
2. Use only paper that meets HP specifications for this product.
3. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.
5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.

Prevent paper jams

To reduce the number of paper jams, try these solutions.

1. Use only paper that meets HP specifications for this product.
2. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
3. Use paper that has not previously been printed or copied on.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.
5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.
6. Make sure that the tray is fully inserted in the product.
7. If you are printing on heavy, embossed, or perforated paper, use the manual feed feature and feed sheets one at a time.
Clear jams

When clearing jams, be very careful not to tear jammed paper. If a small piece of paper remains in the product, it could cause additional jams.

⚠️ CAUTION: Before clearing jams, turn the product off, and then disconnect the power cord.

Jam locations

Jams can occur at the following locations in the product.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Document feeder</td>
</tr>
<tr>
<td>2</td>
<td>Output bins</td>
</tr>
<tr>
<td>3</td>
<td>Input trays</td>
</tr>
<tr>
<td>4</td>
<td>Print cartridge area</td>
</tr>
<tr>
<td>5</td>
<td>Rear door and duplexer</td>
</tr>
</tbody>
</table>
Clear jams from the document feeder

1. Open the document feeder cover.

2. Lift the side lever to open the pickup assembly, and then gently pull the jammed paper out.

3. Close the pickup assembly and the document feeder cover.
Clear jams from the input trays

1. Open the print cartridge door, and then remove the print cartridge.

2. Remove all media from the main tray and the priority input slot.
3. With both hands, grasp the side of the jammed media that is most visible (this includes the middle), and carefully pull it free from the product.

4. Reinstall the print cartridge and close the print cartridge door.
Clear jams from inside the product

1. Open the print cartridge door, and then remove the print cartridge.
   
   **CAUTION:** To prevent damage, do not expose the print cartridge to light. Cover it with a piece of paper.

2. If you can see the jammed paper, carefully grasp the jammed paper, and then slowly pull it out of the product.
   
   **NOTE:** If you can not see the jammed paper, continue go to the next step.

   If you successfully removed the jammed paper, skip the next step.
3. Press the green tab, open the jam access door, carefully grasp the jammed paper, and then slowly pull the paper out of the product. Close the jam access door.

4. Reinstall the print cartridge, and then close the print cartridge door.
Clear jams from the output areas

⚠️ CAUTION: Do not use sharp objects, such as tweezers or needle nose pliers, to remove jams. Damage caused by sharp objects will not be covered by the warranty.

1. Open the print cartridge door, and then remove the print cartridge.

2. Keep the print cartridge door open, and then use both hands to grasp the side of the jammed media that is most visible (this includes the middle). Carefully pull the paper free from the product.

3. Press the green tab, and then open the jam access door.
4. Carefully grasp the jammed paper, and then slowly pull it out of the product. Close the jam access door.

5. Reinstall the print cartridge, and then close the print cartridge door.

Clear jams from the duplexer

1. Open the print cartridge door, and then remove the print cartridge.
2. Open the duplexer door.
   **CAUTION:** The fuser area can be hot while the product is in use. Wait for the fuser to cool.

3. Carefully grasp the jammed paper, and then slowly pull it out of the product.
4. Close the duplexer door.

5. Reinstall the print cartridge, and then close the print cartridge door.
**Improve print quality**

You can prevent most print-quality problems by following these guidelines.

- Use the correct paper type setting in the printer driver.
- Use paper that meets HP specifications for this product.
- Clean the product as necessary.
- Replace print cartridges when they are reaching the end of their estimated life and print quality is no longer acceptable.
- Use the printer driver that best meets your printing needs.

**Select a paper type**

1. Open the printer driver, click the **Properties** or **Preferences** button, and then click the **Paper/Quality** tab.
2. Select a type from the **Type is** drop-down list.
3. Click the **OK** button.

**Use paper that meets HP specifications**

Use different paper if you are having any of the following problems:

- The printing is too light or seems faded in areas.
- Specks of toner are on the printed pages.
- Toner is smearing on the printed pages.
- Printed characters seem misformed.
- Printed pages are curled.

Always use a paper type and weight that this product supports. In addition, follow these guidelines when selecting paper:

- Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
- Use paper that has not been previously printed on.
- Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
- Use paper that is not too rough. Using smoother paper generally results in better print quality.
Print a cleaning page

Print a cleaning page to remove dust and excess toner from the paper path if you are having any of the following problems:

- Specks of toner are on the printed pages.
- Toner is smearing on the printed pages.
- Repeated marks occur on the printed pages.

Use the following procedure to print a cleaning page.

1. On the product control panel, press the Setup button.
2. Use the arrow buttons to select the Service menu.
3. Use the arrow buttons to select the Cleaning Page item.
4. Load plain letter or A4 paper when you are prompted.
5. Press the OK button to begin the cleaning process.

A page feeds through the product slowly. Discard the page when the process is completed.

Check the print cartridge

Check the print cartridge, and replace it if necessary, if you are having any of the following problems:

- The printing is too light or seems faded in areas.
- Printed pages have small unprinted areas.
- Printed pages have streaks or bands.

**NOTE:** If you are using a draft or EconoMode print setting, the printing might appear light.

If you determine that you need to replace a print cartridge, print the supplies status page to find the part number for the correct genuine HP print cartridge.

<table>
<thead>
<tr>
<th>Type of print cartridge</th>
<th>Steps to resolve the problem</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refilled or remanufactured print cartridge</td>
<td>Hewlett-Packard Company cannot recommend the use of non-HP supplies, either new or remanufactured. Because they are not HP products, HP cannot influence their design or control their quality. If you are using a refilled or remanufactured print cartridge and are not satisfied with the print quality, replace the cartridge with a genuine HP cartridge that has the words “HP” or “Hewlett-Packard” on it, or has the HP logo on it.</td>
</tr>
</tbody>
</table>
| Genuine HP print cartridge              | 1. The product control panel or the supplies status page indicates **Very Low** status when the cartridge has reached the end of its designated life. Replace the print cartridge if print quality is no longer acceptable.  
2. Visually inspect the print cartridge for damage. See the instructions that follow. Replace the print cartridge if necessary.  
3. If printed pages have marks that repeat several times at the same distance apart, print a cleaning page. If this does not solve the problem, use the repeating defects information in this document to identify the cause of the problem. |
Print the Supplies Status page

The Supplies Status page indicates the estimated life remaining in print cartridges. It also lists the part number for the correct genuine HP print cartridge for your product so you can order a replacement print cartridge, as well as other useful information.

1. On the product control panel, open the Reports menu.
2. Select the Supplies Status page to print it.
Inspect the print cartridge for damage

1. Remove the print cartridge from the product, and verify that the sealing tape has been removed.
2. Check the memory chip for damage.
3. Examine the surface of the green imaging drum on the bottom of the print cartridge.

⚠️ **CAUTION:** Do not touch the green roller (imaging drum) on the bottom of the cartridge. Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on the imaging drum, replace the print cartridge.
5. If the imaging drum does not appear to be damaged, rock the print cartridge gently several times and reinstall it. Print a few pages to see if the problem has resolved.

Repeating defects

If defects repeat at any of the following approximate intervals on the page, the print cartridge might be damaged.

- 27 mm
- 29 mm
- 75 mm
Use the printer driver that best meets your printing needs

You might need to use a different printer driver if the printed page has unexpected lines in graphics, missing text, missing graphics, incorrect formatting, or substituted fonts.

| HP PCL 6 driver | • Provided as the default driver. This driver is automatically installed unless you select a different one.  
|                 | • Recommended for all Windows environments  
|                 | • Provides the overall best speed, print quality, and product-feature support for most users  
|                 | • Developed to align with the Windows Graphic Device Interface (GDI) for the best speed in Windows environments  
|                 | • Might not be fully compatible with third-party and custom software programs that are based on PCL 5  
| HP UPD PS driver | • Recommended for printing with Adobe® software programs or with other highly graphics-intensive software programs  
|                 | • Provides support for printing from postscript emulation needs, or for postscript flash font support  
| HP UPD PCL 5 | • Recommended for general office printing in Windows environments  
|               | • Compatible with previous PCL versions and older HP LaserJet products  
|               | • The best choice for printing from third-party or custom software programs  
|               | • The best choice when operating with mixed environments, which require the product to be set to PCL 5 (UNIX, Linux, mainframe)  
|               | • Designed for use in corporate Windows environments to provide a single driver for use with multiple printer models  
|               | • Preferred when printing to multiple printer models from a mobile Windows computer  

Download additional printer drivers from this Web site: [www.hp.com/go/ljm1530series_software](http://www.hp.com/go/ljm1530series_software).

Improve print quality for copies

If you encounter print quality problems in copied documents, review the solutions for printed documents listed previously in this document. However, some print-quality problems occur only in copied documents.

- If streaks appear on copies made by using the document feeder, clean the small glass strip on the left side of the scanner assembly.
- If dots or other defects appear on copies made by using the scanner glass, clean the scanner glass and the white plastic backing.
1. Use the power switch to turn off the product, and then unplug the power cord from the electrical socket.

2. Open the scanner lid.

3. Clean the scanner glass and the white plastic backing with a soft cloth or sponge that has been moistened with nonabrasive glass cleaner.

⚠️ **CAUTION:** Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the product; these can damage the product. Do not place liquids directly on the glass or platen. They might seep and damage the product.

4. Dry the glass and white plastic backing with a chamois or a cellulose sponge to prevent spotting.

5. Plug in the product, and then use the power switch to turn on the product.
Clean the product

Clean the pickup roller

If you want to clean the pickup roller before deciding to replace it, follow these instructions:

1. Turn off the product, unplug the power cord from the product, and then remove the pickup roller.
2. Dab a lint-free cloth in isopropyl alcohol, and then scrub the roller.

⚠️ **WARNING!** Alcohol is flammable. Keep the alcohol and cloth away from an open flame. Before you close the product and plug in the power cord, allow the alcohol to dry completely.

❗️ **NOTE:** In certain areas of California, air pollution control regulations restrict the use of liquid isopropyl alcohol (IPA) as a cleaning agent. In those areas of California, please disregard the previous recommendations and use a dry, lint free cloth, moistened with water, to clean the pickup roller.

3. Use a dry, lint free cloth, to wipe the pickup roller and remove loose dirt.

4. Allow the pickup roller to dry completely before you reinstall it.

5. Plug the power cord into the product.
Clean the document feeder pickup rollers and separation pad

If the product document feeder experiences paper-handling problems, such as jams or multiple-page feeds, clean the document feeder rollers and separation pad.

1. Open the document feeder cover.

2. Use a moist, lint-free cloth to wipe both pickup rollers and the separation pad to remove dirt.

3. Close the document feeder cover.
Clean the paper path

During the printing process, paper, toner, and dust particles can accumulate inside the product. Over time, this buildup can cause print quality problems such as toner specks or smearing. This product has a cleaning mode that can correct and prevent these types of problems.

Clean the paper path from HP ToolboxFX

Use HP ToolboxFX to clean the paper path. This is the recommended cleaning method. If you do not have access to HP ToolboxFX, use the control panel method.

1. Make sure that the product is turned on and in the Ready state and that paper is loaded in the priority input tray or Tray 1.
2. Open HP ToolboxFX, click the product, and then click the **System Settings** tab.
3. Click the **Service** tab, and then click **Start**.

   A page feeds through the product slowly. Discard the page when the process is complete.

Clean the paper path from the control panel

If you do not have access to HP ToolboxFX, you can print a cleaning page from the control panel.

1. Press the Setup button.
2. Use the arrow buttons to select the **Service** menu, and then press **OK**.
3. Use the arrow buttons to select **Cleaning Page**, and then press **OK**.
4. Load plain letter or A4 paper when prompted.
5. Press **OK** again to confirm and begin the cleaning process.

   A page feeds through the product slowly. Discard the page when the process is complete.

Clean the scanner glass strip and platen

Over time, specks of debris can collect on the scanner glass and on the white plastic backing. This can affect printing performance. Use the following procedure to clean the scanner glass and the white plastic backing.

1. Use the power switch to turn off the product, and then unplug the power cord from the electrical outlet.
2. Open the scanner lid.
3. Clean the scanner glass and the white plastic backing with a soft cloth or a sponge moistened with nonabrasive glass cleaner.

\[\text{CAUTION:} \] Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the product. These substances can damage the product. Do not place liquids directly on the glass or the platen. They can seep and damage the product.

4. Dry the glass and the white plastic backing with a chamois or a cellulose sponge to prevent spotting.

5. Plug in the product, and then use the power switch to turn on the product.
The product does not print or it prints slowly

The product does not print

If the product does not print at all, try the following solutions.

1. Make sure that the product is turned on and that the control panel indicates it is ready.
   ◦ If the control panel does not indicate the product is ready, turn the product off, and then turn it on.
   ◦ If the control panel indicates the product is ready, try sending the job again.

2. If the control panel indicates the product has an error, resolve the error, and then try sending the job again.

3. Make sure that all of the cables are connected correctly. If the product is connected to a network, check the following items:
   ◦ Check the light next to the network connection on the product. The light is green if the network is active.
   ◦ Make sure that the network is connected using a network cable rather than a telephone cable.
   ◦ Make sure that the network router, hub, or switch is turned on and that it is working correctly.

4. Install the HP software from the CD that came with the product. Using generic printer drivers can cause delays clearing jobs from the print queue.

5. From the list of printers on the computer, right-click the entry for the product, click Properties, and then open the Ports tab.
   ◦ If you are using a network cable to connect to the network, make sure that the printer name listed on the Ports tab matches the product name on the product configuration page.
   ◦ If you are using a USB cable and are connecting to a wireless network, make sure that the box is checked next to Virtual printer port for USB.

6. If the computer has a personal firewall system, it might be blocking communication with the product. Try disabling the firewall temporarily to see if it is the source of the problem.

7. If the computer or the product is connected to a wireless network, low signal quality or interference might be delaying print jobs.

The product prints slowly

If the product prints, but it seems slow, try the following solutions.

1. Make sure that the computer meets the minimum specifications for this product. For a list of specifications, go to this Web site: www.hp.com/support/ljm1530series.

2. When you configure the product to print on some paper types, such as heavy paper, the product prints more slowly so it can fuse the toner correctly to the paper. If the paper type setting is not correct for the type of paper you are using, change the setting to the correct paper type.
3. If the computer or the product is connected to a wireless network, low signal quality or interference can delay print jobs.

4. Disable the product **Quiet Mode** setting. When this mode is turned on, the product prints at a slower speed.

5. If the product is connected directly to a computer, change the **USB Speed** setting. An incorrect USB setting can cause slow printing.
Solve connectivity problems

Solve direct-connect problems

If you have connected the product directly to a computer, check the cable.

- Verify that the cable is connected to the computer and to the product.
- Verify that the cable is not longer than 5 m (16.4 ft). Try using a shorter cable.
- Verify that the cable is working correctly by connecting it to another product. Replace the cable if necessary.

Solve network problems

Check the following items to verify that the product is communicating with the network. Before beginning, print a configuration page from the product control panel and locate the product IP address that is listed on this page.

- **Poor physical connection**
- **The computer is using the incorrect IP address for the product**
- **The computer is unable to communicate with the product**
- **The product is using incorrect link and duplex settings for the network**
- **New software programs might be causing compatibility problems**
- **The computer or workstation might be set up incorrectly**
- **The product is disabled, or other network settings are incorrect**

**Poor physical connection**

1. Verify that the product is attached to the correct network port using a cable of the correct length.
2. Verify that cable connections are secure.
3. Look at the network port connection on the back of the product, and verify that the amber activity light and the green link-status light are lit.
4. If the problem continues, try a different cable or port on the hub.

**The computer is using the incorrect IP address for the product**

1. Open the printer properties and click the *Ports* tab. Verify that the current IP address for the product is selected. The product IP address is listed on the product configuration page.
2. If you installed the product using the HP standard TCP/IP port, select the box labeled *Always print to this printer, even if its IP address changes*.
3. If you installed the product using a Microsoft standard TCP/IP port, use the hostname instead of the IP address.
4. If the IP address is correct, delete the product and then add it again.
The computer is unable to communicate with the product

1. Test network communication by pinging the network.
   a. Open a command-line prompt on your computer. For Windows, click Start, click Run, and then type cmd.
   b. Type ping followed by the IP address for your product.
   c. If the window displays round-trip times, the network is working.

2. If the ping command failed, verify that the network hubs are on, and then verify that the network settings, the product, and the computer are all configured for the same network.

The product is using incorrect link and duplex settings for the network

Hewlett-Packard recommends leaving this setting in automatic mode (the default setting). If you change these settings, you must also change them for your network.

New software programs might be causing compatibility problems

Verify that any new software programs are correctly installed and that they use the correct printer driver.

The computer or workstation might be set up incorrectly

1. Check the network drivers, printer drivers, and the network redirection.
2. Verify that the operating system is configured correctly.

The product is disabled, or other network settings are incorrect

1. Review the configuration page to check the status of the network protocol. Enable it if necessary.
2. Reconfigure the network settings if necessary.
Service mode functions

Secondary service menu

Use the secondary service menu to print service-related reports and to run special tests. Customers do not have access to this menu.

Open the secondary service menu

1. Ensure the product is in the **Ready** state.
2. Press the Setup ↘ button to open the menus.
3. Press and hold the Left arrow ⬅ button, then press the Cancel ✗ button, and then release them.
4. Press the Setup ↘ button again to open the service menus, and then press the OK button to open secondary service menu.
5. Press the Left arrow ⬅ button and the Right arrow ⬆ button to navigate through the menus.
6. Press the OK button to open a sub menu.

### Product resets

To restore the product to the factory-default settings, follow these steps.

1. Turn the product off.
2. Press and hold the Right arrow button and the Cancel button at the same time.
3. While holding down both buttons, turn the product on.
4. Continue to hold both buttons until **Permanent Storage init.** appears on the display, and then release both buttons.

### Solve fax problems

#### Fax troubleshooting checklist

- Several possible fixes are available. After each recommended action, retry faxing to see if the problem is resolved.
- For best results during fax problem solving, make sure the line from the product is plugged directly into the wall phone port. Disconnect all other devices that are connected to the product.

1. Verify that the telephone cord is plugged into the correct port on the back of the product.
2. Check the phone line by using the fax test:
   a. On the control panel, open the **Setup** menu, and then open the **Service** menu.
   b. Select the **Fax Service** option.
   c. Select the **Run Fax Test** option. The product prints a fax test report.

The report contains the following possible results:

- **Pass:** The report contains all of the current fax settings for review.
- **Fail:** The cord is in the wrong port. The report contains suggestions for how to resolve the issue.
- **Fail:** The phone line is not active. The report contains suggestions for how to resolve the issue.
3. Verify that the product firmware is current:
   a. Print a configuration page from the control panel Reports menu to obtain the current firmware date code.
      1. Click the Support & Drivers link.
      2. Click the Download drivers and software (and firmware) link option.
      3. In the For product box, type the product model number, and then click the Go button.
      4. Click the link for your operating system.
      5. Scroll to the Firmware section of the table.
         ◦ If the listed version matches the version on the configuration page, you have the most current version.
         ◦ If the versions are different, download the firmware upgrade and update the firmware on the product following the instructions onscreen.

   $\textcolor{blue}{\textbf{NOTE:}}$ The product must be connected to a computer with internet access to upgrade firmware.
   ◦ Resend the fax.

4. Verify that the fax was set up when the product software was installed.
   From the computer, in the HP program folder, run the Fax Setup Utility.

5. Verify that the telephone service supports analog fax.
   - If using ISDN or digital PBX, contact your service provider for information about configuring to an analog fax line.
   - If using a VoIP service, change the Fax Speed setting to Slow(V.29) or disable Fast(V.34) from the control panel. Ask if your service provider supports fax and for the recommended fax modem speed. Some companies might require an adapter.
   - If using a DSL service, ensure that a filter is included on the phone line connection to the product. Contact the DSL service provider or purchase a DSL filter if you do not have one. If a DSL filter is installed, try another since these filters can be defective.

6. If the error persists, find more detailed problem-solving solutions in the sections that follow this one.
Troubleshoot fax codes and trace reports

View and interpret fax error codes

Use fax error codes from the fax activity log to solve problems with the product fax features.

<table>
<thead>
<tr>
<th>Code number</th>
<th>Description</th>
</tr>
</thead>
</table>
| 232         | Possible causes include the following:  
  ● A communication failure has occurred between the two machines.  
  ● The user at the remote machine may have pressed the Stop button.  
  ● The power at the remote machine has been interrupted, or deliberately turned off causing the fax session to be interrupted.  
  To solve the issue, try the following steps:  
  1. Resend the fax at a different time when telephone line conditions have improved.  
  2. If the error persists, and error correction is in use for the fax session, disable the Error Correction setting. |
| 282         | The product has not received any data at the start of a page during reception in error correction mode, but the modem has not detected a remote disconnect. The remote machine is probably transmitting sync frames instead of data and has either jammed or broken.  
  Have the sender resend the fax after first requesting that the sender verify that the sending machine is working correctly. |
| 321         | There was a communication error with the receiving fax machine due to poor telephone line conditions.  
  Resend the fax at a different time when telephone line conditions have improved. |
| 344-348     | Possible causes include the following:  
  ● The remote machine has failed to respond to a fax command from the local machine due to the connection being interrupted.  
  ● The user at the remote machine may have pressed the Stop button.  
  ● In rare instances, incompatibility between the two machines can cause the remote machine to simply terminate the call.  
  To solve the issue, try the following steps:  
  1. Resend the fax at a different time when telephone line conditions have improved.  
  2. If the error persists, and error correction is in use for the fax session, disable the Error Correction setting. |
| 381         | Possible causes include the following:  
  ● The remote machine has failed to respond to a fax command from the local machine due to the connection being interrupted.  
  ● The user at the remote machine may have pressed the Stop button.  
  To solve the issue, try the following steps:  
  1. Resend the fax at a different time when telephone line conditions have improved.  
  2. If the error persists, and error correction is in use for the fax session, disable the Error Correction setting. |
View the fax trace report

A fax T.30 trace report has information that can help resolve fax transmission problems. If you call HP for help in resolving these problems, print a T.30 trace report before you call.

1. On the control panel, press the Setup button.
2. Select the Service menu.
3. Select the Fax Service option.
4. Select the Print T.30 Trace option. The product prints a fax trace report.
Fax logs and reports

Use the following instructions to print fax logs and reports:

Print all fax reports

Use this procedure to print all of the following reports at one time:

- Fax activity log
- Phone book list
- Configuration report
- Junk fax list
- Last call report
- Billing report
- Usage page

1. On the control panel, press the Fax Menu button.

2. Use the arrow buttons to select the Fax Reports menu, and then press the OK button.

3. Use the arrow buttons to select the All Fax Reports option, and then press the OK button. The product exits the menu settings and prints the reports.

Print individual fax reports

1. On the control panel, press the Fax Menu button.
2. Use the arrow buttons to select the **Fax Reports** menu, and then press the **OK** button.

3. Use the arrow buttons to select the report to be printed, and then press the **OK** button. The product exits the menu settings and prints the report.

   **NOTE:** If you selected the **Fax Activity Log** report and pressed the **OK** button, press the **OK** button again to select the **Print Log Now** option. The product exits the menu settings and prints the log.

---

### Set the fax activity log to print automatically

1. On the control panel, press the **Fax Menu** button.

2. Use the arrow buttons to select the **Fax Reports** menu, and then press the **OK** button.

3. Use the arrow buttons to select the **Fax Activity Log** menu, and then press the **OK** button.

4. Use the arrow buttons to select the **Auto Log Print** menu, and then press the **OK** button.

5. Use the arrow buttons to select the **On** option, and then press the **OK** button to confirm the selection.

---

### Set the fax error report

A fax error report is a brief report that indicates the product experienced a fax job error. It can be set to print after the following events:

- Every fax error (the factory-set default)
- Send fax error
- Receive fax error
- Never

**NOTE:** If you select **Never**, you will have no indication that a fax failed to be transmitted unless you print a fax activity log.
1. On the control panel, press the Fax Menu button.

2. Use the arrow buttons to select the Fax Reports menu, and then press the OK button.

3. Use the arrow buttons to select the Fax Error Report menu, and then press the OK button.

4. Use the arrow buttons to select the option for when you want the fax error reports to be printed.

5. Press the OK button to save the selection.

Set the fax confirmation report

A confirmation report is a brief report that indicates the product successfully sent or received a fax job. It can be set to print after the following events:

- Every fax job
- Send fax
- Receive fax
- Never (the factory-set default)

1. On the control panel, press the Fax Menu button.

2. Use the arrow buttons to select the Fax Reports menu, and then press the OK button.

3. Use the arrow buttons to select the Fax Confirmation menu, and then press the OK button.

4. Use the arrow buttons to select the option for when you want the fax error reports to be printed.

5. Press the OK button to save the selection.
Include the first page of each fax on the fax confirmation, fax error, and last call reports

1. On the control panel, press the Fax Menu button.

2. Use the arrow buttons to select the Fax Reports menu, and then press the OK button.

3. Use the arrow buttons to select the Include 1st page menu, and then press the OK button.

4. Use the arrow buttons to select the On option, and then press the OK button to confirm the selection.

Change error correction and fax speed

Set the fax-error-correction mode

Usually, the product monitors the signals on the telephone line while it is sending or receiving a fax. If the product detects an error during the transmission and the error-correction setting is On, the product can request that the portion of the fax be resent. The factory-set default for error correction is On.

You should turn off error correction only if you are having trouble sending or receiving a fax, and you are willing to accept the errors in the transmission. Turning off the setting might be useful when you are trying to send a fax overseas or receive one from overseas, or if you are using a satellite telephone connection.

1. On the control panel, press the Setup button.

2. Use the arrow buttons to select the Service menu, and then press the OK button.

3. Use the arrow buttons to select the Fax Service menu, and then press the OK button.

4. Use the arrow buttons to select the Error Correction menu, and then press the OK button.

5. Use the arrow buttons to select the On or Off option, and then press the OK button to save the selection.

Change the fax speed

The fax-speed setting is the modem protocol that the product uses to send faxes. It is the worldwide standard for full-duplex modems that send and receive data across telephone lines at up to 33,600 bits per second (bps). The factory-set default for the fax-speed setting is Fast(V.34).
You should change the setting only if you are having trouble sending a fax to or receiving a fax from a particular device. Decreasing the fax speed might be useful when you are trying to send a fax overseas, or receive one from overseas, or if you are using a satellite telephone connection.

1. On the control panel, press the Setup button.
2. Use the arrow buttons to select the Fax Setup menu, and then press the OK button.
3. Use the arrow buttons to select the Advanced Setup menu, and then press the OK button.
4. Use the arrow buttons to select the Fax Speed menu, and then press the OK button.
5. Use the arrow buttons to select a speed setting, and then press the OK button.

**Solve problems sending faxes**

- An error message displays on the control panel
- The control panel displays a Ready message with no attempt to send the fax
- The control panel displays the message "Storing page 1" and does not progress beyond that message
- Faxes can be received, but not sent
- Unable to use fax functions from the control panel
- Unable to use speed dials
- Unable to use group dials
- Receive a recorded error message from the phone company when trying to send a fax
- Unable to send a fax when a phone is connected to the product

**An error message displays on the control panel**

**The Comm. Error message appears**

- Allow the product to retry sending the fax. Re-sending temporarily reduces the fax speed.
- Unplug the product telephone cord from the wall, plug in a telephone, and try making a call. Plug the product phone cord into a jack for another phone line.
- Try a different phone cord.
- From the control panel, change the Fax Speed option to the Medium(V.17) setting or Slow(V.29) setting.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Advanced Setup menu.
  d. Open the Fax Speed menu.
  e. Select the correct setting.
- Turn off the **Error Correction** option.
  
  a. Open the **Setup** menu.
  b. Open the **Service** menu.
  c. Open the **Fax Service** menu.
  d. Open the **Error Correction** menu.
  e. Select the **Off** setting.

  **NOTE:** Turning off the **Error Correction** option can reduce image quality.

- If the error persists, replace the fax PCA.

**No dial tone**

- Make sure that the telephone cord is plugged into the correct port on the product.
- Make sure that the telephone cord from the product is plugged directly into the wall telephone jack.
- Check for a dial tone on the phone line by using the **Start Fax** button.
- Unplug the product telephone cord from the wall, plug in a telephone, and try making a voice call.
- Unplug the telephone cord from both the product and the wall and replug the cord.
- Make sure that you are using the telephone cord that came with the product.
- Plug the product phone cord into a jack for another phone line.
- Check the phone line by using the **Run Fax Test** option from the **Service** menu on the control panel.
  
  a. Open the **Setup** menu.
  b. Open the **Service** menu.
  c. Open the **Fax Service** menu.
  d. Select the **Run Fax Test** item.

**The Fax is busy message appears**

- Try sending the fax again.
- Call the recipient to ensure that the fax machine is on and ready.
- Check that you are dialing the correct fax number.
- Check for a dial tone on the phone line by using the **Start Fax** button.
- Make sure that the phone is working by disconnecting the product, plugging in a telephone to the phone line, and making a voice call.
- Plug the product phone cord into a jack for another phone line, and try sending the fax again.
- Try a different phone cord.
● Send the fax at a later time.
● If the error persists, replace the fax PCA.

The No fax answer message appears
● Try to resend the fax.
● Call the recipient to ensure that the fax machine is on and ready.
● Check that you are dialing the correct fax number.
● Unplug the product telephone cord from the wall, plug in a telephone, and try making a voice call.
● Plug the product phone cord into a jack for another phone line.
● Try a different phone cord.
● Make sure that the phone cord from the wall telephone jack is plugged into the line port.
● Check the phone line by using the Run Fax Test option from the Service menu on the control panel.
   a. Open the Setup menu.
   b. Open the Service menu.
   c. Open the Fax Service menu.
   d. Select the Run Fax Test item.
● If the error persists, replace the fax PCA.

Document feeder paper jam
● Verify that the paper meets product size requirements. The product does not support pages longer than 381 mm (15 in) for faxing.
● Copy or print the original to letter, A4, or legal size paper, and then resend the fax.

The Fax memory full message appears
● Turn the product off then on.
● Print stored faxes that have not been printed.
   a. Open the Fax menu.
   b. Open the Receive Options menu.
   c. Select the Print Faxes item.
   d. Provide the PIN, and then select the Private Receive item.
● Delete stored faxes from memory.
   a. Open the Setup menu.
   b. Open the Service menu.
c. Open the Fax Service menu.
d. Select the Clear Saved Faxes item.

- Divide the large fax job into smaller sections, and then fax them individually.

Scanner error

- Verify that the paper meets product size requirements. The product does not support pages longer than 381 mm (15 in) for faxing.
- Copy or print the original onto letter, A4, or legal size paper and then resend the fax.

The control panel displays a Ready message with no attempt to send the fax

- Check the fax activity log for errors.
  a. Open the Fax menu.
  b. Open the Fax Reports menu.
  c. Open the Fax Activity Log menu.
  d. Select the Print Log Now option.
- If a phone is connected to the product, make sure that the phone is hung up.
- Disconnect all other lines between the fax and the product.
- Connect the product directly into the wall telephone jack and resend the fax.

The control panel displays the message "Storing page 1" and does not progress beyond that message

- Delete stored faxes from memory.
  a. Open the Setup menu.
  b. Open the Service menu.
  c. Open the Fax Service menu.
  d. Select the Clear Saved Faxes item.

Faxes can be received, but not sent

1. Check for a dial tone on the phone line by using the Start Fax button.
2. Turn the product off then on.
3. Use the control panel to configure the fax time, date, and fax header information.
   a. Open the Setup menu.
   b. Open the Fax Setup menu.
   c. Open the Basic Setup menu.
d. Open the **Fax Header** menu.

**4.** Verify that any extension phones on the line are hung up.

**5.** If using a DSL service, make sure that the phone line connection to the product includes a filter.

### Unable to use fax functions from the control panel

- The product might be password protected. Use the HP Embedded Web Server, HP Toolbox software, or the control panel to set a password.

- If you do not know the password for the product, contact your system administrator.

- Verify with the system administrator that the fax functionality has not been disabled.

### Unable to use speed dials

- Make sure that the fax number is valid.

- If an outside line requires a prefix, turn on the **Dial Prefix** option or include the prefix in the speed dial number.

  a. Open the **Setup** menu.
  
  b. Open the **Fax Setup** menu.
  
  c. Open the **Basic Setup** menu.
  
  d. Open the **Dial Prefix** menu.
  
  e. Select the **On** setting.

### Unable to use group dials

- Make sure that the fax number is valid.

- If an outside line requires a prefix, turn on the **Dial Prefix** option or include the prefix in the speed dial number.

  a. Open the **Setup** menu.
  
  b. Open the **Fax Setup** menu.
  
  c. Open the **Basic Setup** menu.
  
  d. Open the **Dial Prefix** menu.
  
  e. Select the **On** setting.

- Set up all entries in the group with speed dial entries.

  a. Open an unused speed dial entry.
  
  b. Enter the fax number for the speed dial.
  
  c. Use the **OK** button to save the speed dial.
Receive a recorded error message from the phone company when trying to send a fax

- Make sure you dial the fax number correctly, and make sure that the phone service is not blocked. For example, some phone services might prevent long distance calling.

- If an outside line requires a prefix, turn on the **Dial Prefix** option or include the prefix in the speed dial number.
  
  a. Open the **Setup** menu.
  
  b. Open the **Fax Setup** menu.
  
  c. Open the **Basic Setup** menu.
  
  d. Open the **Dial Prefix** menu.
  
  e. Select the **On** setting.

  **NOTE:** To send a fax without a prefix, when the **Dial Prefix** option is turned on, send the fax manually.

- Send a fax to an international number
  
  a. If a prefix is required, manually dial the telephone number with the prefix.
  
  b. Enter the country/region code before dialing the phone number.
  
  c. Wait for pauses as you hear the tones on the phone.
  
  d. Send the fax manually from the control panel.

Unable to send a fax when a phone is connected to the product

- Make sure that the telephone is hung up.
- Make sure that the telephone is not being used for a voice call when faxing.
- Unplug the phone from the line, and then try sending the fax.
Solve problems receiving faxes

- The fax does not respond
- An error message displays on the control panel
- A fax is received but does not print
- Sender receives a busy signal
- No dial tone
- Cannot send or receive a fax on a PBX line

The fax does not respond

The fax has a dedicated phone line

- Set the Answer Mode option to the Automatic setting from the control panel.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Basic Setup menu.
  d. Open the Answer Mode menu.
  e. Select the Automatic setting.

An answering machine is connected to the product

- Set the Answer Mode option to the TAM setting and plug the answering machine into the "telephone" port.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Basic Setup menu.
  d. Open the Answer Mode menu.
  e. Select the TAM setting.

If the TAM setting is unavailable, set the Answer Mode option to the Automatic setting.

- Set the Rings to Answer setting to at least one ring more than the number of rings for which the answering machine is set.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Basic Setup menu.
  d. Open the Rings to Answer menu.
  e. Select the correct setting.
• Plug the answering machine into the “telephone” port.

• If the product has a telephone handset connected, set the Answer Mode option to the Fax/Tel setting to route calls to the correct device. When detecting a voice call, the product generates a ring tone that alerts you to pick up the telephone handset.
  
  a. Open the Setup menu.
  
  b. Open the Fax Setup menu.
  
  c. Open the Basic Setup menu.
  
  d. Open the Answer Mode menu.

  e. Select the Fax/Tel setting.

A telephone handset is connected to the product

Set the Answer Mode option to the Automatic setting.

1. Open the Setup menu.

2. Open the Fax Setup menu.

3. Open the Basic Setup menu.

4. Open the Answer Mode menu.

5. Select the Automatic setting.

The Answer Mode setting is set to the Manual setting

• Press the Start Fax button on the control panel.

Voice mail is available on the fax line

• Add a distinctive ring service to your telephone line and change the Distinctive Ring setting on the product to match the ring pattern supplied by the telephone company. Contact your telephone company for information.

  a. Verify that the answer mode is set to the Automatic setting.

  b. Open the Setup menu.

  c. Open the Fax Setup menu.

  d. Open the Basic Setup menu.

  e. Open the Distinctive Ring menu.

  f. Select the correct setting.

• Buy a dedicated line for faxing.

• Set the Answer Mode option to the Manual setting.

  a. Open the Setup menu.

  b. Open the Fax Setup menu.

  c. Open the Basic Setup menu.
d. Open the **Answer Mode** menu.

e. Select the **Manual** setting.

⚠️ **NOTE:** You must be present to receive faxes.

---

### The product is connected to a DSL phone service

- Check the installation and features. The fax unit in the product requires a filter on the phone line connection to the DSL modem. Contact your DSL service provider for a filter or buy a filter.
- Verify that the filter is plugged in.
- Replace the existing filter to make sure that it is not defective.

### The product uses a fax over IP or VoIP phone service

- Set the **Fax Speed** option to the **Slow(V.29)** setting, or disable the **Fast(V.34)** setting.
  
  a. Open the **Setup** menu.
  
  b. Open the **Fax Setup** menu.
  
  c. Open the **Advanced Setup** menu.
  
  d. Open the **Fax Speed** menu.
  
  e. Select the correct setting.

- Contact your service provider to make sure that fax is supported and for a recommended fax speed settings. Some companies might require an adapter.

---

### An error message displays on the control panel

#### The No fax detected message appears

⚠️ **NOTE:** This error does not always refer to a missed fax. If a voice call is made to a fax number by mistake and the caller hangs up, the **No fax detected** message appears on the control panel.

- Ask the sender to resend the fax.
- Make sure that the telephone cord from the product is plugged into the wall telephone jack.
- Try a different phone cord.
- Plug the product phone cord into a jack for another phone line.
- Make sure the telephone line and phone wall jack are active by plugging in a telephone and checking for a dial tone.
- Make sure that the telephone cord is plugged into the “line” port on the product.
- Check the phone line by running a fax test from the control panel.
- If the error persists, replace the fax PCA.
The Comm. Error message appears

- Ask the sender to send the fax again or send at a later time when line conditions have improved.
- Unplug the product telephone cord from the wall, plug in a telephone, and try making a call. Plug the product phone cord into a jack for another phone line.
- Try a different phone cord.
- Set the Fax Speed option to the Slow(V.29) setting or disable the Fast(V.34) setting.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Advanced Setup menu.
  d. Open the Fax Speed menu.
  e. Select the correct setting.
- Turn off the Error Correction feature to prevent automatic error correction.
  a. Open the Setup menu.
  b. Open the Service menu.
  c. Open the Fax Service menu.
  d. Open the Error Correction menu.
  e. Select the Off setting.

**NOTE:** Turning off the Error Correction feature can reduce image quality.

- Print the Fax Activity Log report from the control panel to determine if the error occurs with a specific fax number.
  a. Open the Fax menu.
  b. Open the Fax Reports menu.
  c. Open the Fax Activity Log menu.
  d. Select the Print Log Now option.
- If the error persists, replace the fax PCA.

The Fax memory full message appears

- Turn the product off then on.
- Print all of the faxes, and then have the sender resend the fax.
- Ask the sender to divide a large fax job into smaller sections, and then fax them individually.
- Make sure that the resolution of the sending fax machine is not set to the **Photo** setting or the **Superfine** setting.
  
  a. Open the **Setup** menu.
  
  b. Open the **Fax Setup** menu.
  
  c. Open the **Advanced Setup** menu.
  
  d. Open the **Fax Resolution** menu.
  
  e. Select the correct setting.

- Cancel all fax jobs or clear the faxes from memory.

**The Fax is busy message appears**

- The product cannot receive a fax while attempting to send one. Cancel the fax send and try sending at a later time.

- Allow the product to try sending the fax again.

**A fax is received but does not print**

**The Private Receive feature is on**

- When the **Private Receive** feature is activated, received faxes are stored in memory. A personal identification number (PIN) or password is required to print the stored faxes.

- Enter the PIN or password to print the fax. If you do not know the PIN or password, contact the product administrator.

**NOTE:** Memory errors might occur if the faxes are not printed. The product will not answer if the memory is full.

**The Receive to PC feature is enabled**

- Make sure that the **Receive to PC** option is set up. You must use HP Toolbox software to configure the feature.
  
  a. At the computer, open HP ToolboxFX.
  
  b. Select the product.
  
  c. Click **Fax**.
  
  d. Click **Fax Tasks**.
  
  e. Under **Fax Receive Mode**, select **Receive faxes to this computer**.

- Check communication with the product.
Sender receives a busy signal

A handset is connected to the product

- Make sure the phone is hung up.
- Change the Answer Mode option to match the product setup.
  
  a. Open the Setup menu.
  
  b. Open the Fax Setup menu.
  
  c. Open the Basic Setup menu.
  
  d. Open the Answer Mode menu.
  
  e. Select the setting that matches the product setup.

Set the Answer Mode option to the Fax/Tel setting to automatically receive faxes. The Fax/Tel setting automatically detects whether the incoming transmission is a fax or a voice call and routes the call to the appropriate device.

A phone line splitter is being used

- If you are using a phone line splitter, remove the splitter and set up the phone as a downstream phone.
- Make sure the phone is hung up.
- Make sure the phone is not being used for a voice call when faxing.

No dial tone

- If using a phone line splitter, remove the phone line splitter and set up the phone as a downstream phone.

Cannot send or receive a fax on a PBX line

- If you are using a PBX phone line, contact your PBX administrator to configure an analog fax line for your product.
Solve general fax problems

- **Faxes are sending slowly**
- **Fax quality is poor**
- **Fax cuts off or prints on two pages**

**Faxes are sending slowly**

The product is experiencing poor phone line quality.

- Retry sending the fax when the line conditions have improved.
- Check with the phone service provider that the line supports fax.
- Turn off the **Error Correction** setting.
  
a. Open the **Setup** menu.
  
b. Open the **Service** menu.
  
c. Open the **Fax Service** menu.
  
d. Open the **Error Correction** menu.
  
e. Select the **Off** setting.

**NOTE:** This can reduce image quality.

- Use white paper for the original. Do not use colors such as gray, yellow, or pink.
- Increase the **Fax Speed** setting.
  
a. Open the **Setup** menu.
  
b. Open the **Fax Setup** menu.
  
c. Open the **Advanced Setup** menu.
  
d. Open the **Fax Speed** menu.
  
e. Select the correct setting.
- Divide large fax jobs into smaller sections, and then fax them individually.
- Change the fax settings on the control panel to a lower resolution.
  
a. Open the **Setup** menu.
  
b. Open the **Fax Setup** menu.
  
c. Open the **Advanced Setup** menu.
  
d. Open the **Fax Resolution** menu.
  
e. Select the correct setting.
Fax quality is poor

Fax is blurry or light.

- Increase fax resolution when sending faxes. Resolution does not affect received faxes.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Advanced Setup menu.
  d. Open the Fax Resolution menu.
  e. Select the correct setting.

**NOTE:** Increasing resolution slows transmission speed.

- Turn on the Error Correction setting from the control panel.
  a. Open the Setup menu.
  b. Open the Service menu.
  c. Open the Fax Service menu.
  d. Open the Error Correction menu.
  e. Select the On setting.

- Check the print cartridges and replace if necessary.
- Ask the sender to darken the contrast setting on the sending fax machine, and then resend the fax.

Fax cuts off or prints on two pages

  a. Open the Setup menu.
  b. Open the System Setup menu.
  c. Open the Paper Setup menu.
  d. Open the Def. Paper Size menu.
  e. Select the correct setting.

- Set the paper type and size for the tray used for faxes.
- Turn on the Fit to Page setting to print longer length faxes on letter or A4 size paper.
  a. Open the Setup menu.
  b. Open the Fax Setup menu.
  c. Open the Advanced Setup menu.
d. Open the **Fit to Page** menu.

e. Select the **On** setting.

**NOTE:** If the **Fit to Page** setting is off and the **Def. Paper Size** setting is set to letter, a legal size original prints on two pages.

**Product updates**

Software and firmware updates and installation instructions for this product are available at [www.hp.com/support/ljm1530series](http://www.hp.com/support/ljm1530series). Click **Downloads and drivers**, click the operating system, and then select the download for the product.

How to use the parts lists and diagrams

**CAUTION:** Be sure to order the correct part. When looking for part numbers for electrical components, pay careful attention to the voltage that is listed. Doing so will make sure that the part number selected is for the correct model.

**NOTE:** In this manual, the abbreviation “PCA” stands for “printed circuit-board assembly.” Components described as a PCA might consist of a single circuit board or a circuit board plus other parts, such as cables and sensors.

The figures in this chapter show the major subassemblies in the product and their component parts. A parts list table follows each exploded view assembly diagram. Each table lists the item number, the associated part number, and the description of each part. If a part is not listed in the table, then it is not a service part.

A  Service and support

- Hewlett-Packard limited warranty statement
- HP's Premium Protection Warranty: LaserJet print cartridge limited warranty statement
- Data stored on the print cartridge
- End User License Agreement
- Customer support
- Repack the product
HP warrants to you, the end-user customer, that HP hardware and accessories will be free from defects in materials and workmanship after the date of purchase, for the period specified above. If HP receives notice of such defects during the warranty period, HP will, at its option, either repair or replace products which prove to be defective. Replacement products may be either new or equivalent in performance to new.

HP warrants to you that HP software will not fail to execute its programming instructions after the date of purchase, for the period specified above, due to defects in material and workmanship when properly installed and used. If HP receives notice of such defects during the warranty period, HP will replace software which does not execute its programming instructions due to such defects.

HP does not warrant that the operation of HP products will be uninterrupted or error free. If HP is unable, within a reasonable time, to repair or replace any product to a condition as warranted, you will be entitled to a refund of the purchase price upon prompt return of the product.

HP products may contain remanufactured parts equivalent to new in performance or may have been subject to incidental use.

Warranty does not apply to defects resulting from (a) improper or inadequate maintenance or calibration, (b) software, interfacing, parts or supplies not supplied by HP, (c) unauthorized modification or misuse, (d) operation outside of the published environmental specifications for the product, or (e) improper site preparation or maintenance.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTIES ARE EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE. Some countries/regions, states or provinces do not allow limitations on the duration of an implied warranty, so the above limitation or exclusion might not apply to you. This warranty gives you specific legal rights and you might also have other rights that vary from country/region to country/region, state to state, or province to province.

HP's limited warranty is valid in any country/region or locality where HP has a support presence for this product and where HP has marketed this product. The level of warranty service you receive may vary according to local standards. HP will not alter form, fit or function of the product to make it operate in a country/region for which it was never intended to function for legal or regulatory reasons.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE REMEDIES IN THIS WARRANTY STATEMENT ARE YOUR SOLE AND EXCLUSIVE REMEDIES. EXCEPT AS INDICATED ABOVE, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR LOSS OF DATA OR FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. Some countries/regions, states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.
This HP product is warranted to be free from defects in materials and workmanship.

This warranty does not apply to products that (a) have been refilled, refurbished, remanufactured or tampered with in any way, (b) experience problems resulting from misuse, improper storage, or operation outside of the published environmental specifications for the printer product or (c) exhibit wear from ordinary use.

To obtain warranty service, please return the product to place of purchase (with a written description of the problem and print samples) or contact HP customer support. At HP's option, HP will either replace products that prove to be defective or refund your purchase price.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTY IS EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

TO THE EXTENT ALLOWED BY LOCAL LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.
Data stored on the print cartridge

The HP print cartridges used with this product contain a memory chip that assists in the operation of the product.

In addition, this memory chip collects a limited set of information about the usage of the product, which might include the following: the date when the print cartridge was first installed, the date when the print cartridge was last used, the number of pages printed using the print cartridge, the page coverage, the printing modes used, any printing errors that might have occurred, and the product model. This information helps HP design future products to meet our customers’ printing needs.

The data collected from the print cartridge memory chip does not contain information that can be used to identify a customer or user of the print cartridge or their product.

HP collects a sampling of the memory chips from print cartridges returned to HP’s free return and recycling program (HP Planet Partners: [www.hp.com/recycle](http://www.hp.com/recycle)). The memory chips from this sampling are read and studied in order to improve future HP products. HP partners who assist in recycling this print cartridge might have access to this data, as well.

Any third party possessing the print cartridge might have access to the anonymous information on the memory chip. If you prefer to not allow access to this information, you can render the chip inoperable. However, after you render the memory chip inoperable, the memory chip cannot be used in an HP product.
End User License Agreement

PLEASE READ CAREFULLY BEFORE USING THIS SOFTWARE PRODUCT: This End-User License Agreement ("EULA") is a contract between (a) you (either an individual or the entity you represent) and (b) Hewlett-Packard Company ("HP") that governs your use of the software product ("Software"). This EULA does not apply if there is a separate license agreement between you and HP or its suppliers for the Software, including a license agreement in online documentation. The term "Software" may include (i) associated media, (ii) a user guide and other printed materials, and (iii) "online" or electronic documentation (collectively "User Documentation").

RIGHTS IN THE SOFTWARE ARE OFFERED ONLY ON THE CONDITION THAT YOU AGREE TO ALL TERMS AND CONDITIONS OF THIS EULA. BY INSTALLING, COPYING, DOWNLOADING, OR OTHERWISE USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THIS EULA. IF YOU DO NOT ACCEPT THIS EULA, DO NOT INSTALL, DOWNLOAD, OR OTHERWISE USE THE SOFTWARE. IF YOU PURCHASED THE SOFTWARE BUT DO NOT AGREE TO THIS EULA, PLEASE RETURN THE SOFTWARE TO YOUR PLACE OF PURCHASE WITHIN FOURTEEN DAYS FOR A REFUND OF THE PURCHASE PRICE; IF THE SOFTWARE IS INSTALLED ON OR MADE AVAILABLE WITH ANOTHER HP PRODUCT, YOU MAY RETURN THE ENTIRE UNUSED PRODUCT.

1. THIRD PARTY SOFTWARE. The Software may include, in addition to HP proprietary software ("HP Software"), software under licenses from third parties ("Third Party Software" and "Third Party License"). Any Third Party Software is licensed to you subject to the terms and conditions of the corresponding Third Party License. Generally, the Third Party License is located in a file such as license.txt; you should contact HP support if you cannot find any Third Party License. If the Third Party Licenses include licenses that provide for the availability of source code (such as the GNU General Public License) and the corresponding source code is not included with the Software, then check the product support pages of HP's website (hp.com) to learn how to obtain such source code.

2. LICENSE RIGHTS. You will have the following rights provided you comply with all terms and conditions of this EULA:

   a. Use. HP grants you a license to Use one copy of the HP Software. "Use" means installing, copying, storing, loading, executing, displaying, or otherwise using the HP Software. You may not modify the HP Software or disable any licensing or control feature of the HP Software. If this Software is provided by HP for Use with an imaging or printing product (for example, if the Software is a printer driver, firmware, or add-on), the HP Software may only be used with such product ("HP Product"). Additional restrictions on Use may appear in the User Documentation. You may not separate component parts of the HP Software for Use. You do not have the right to distribute the HP Software.

   b. Copying. Your right to copy means you may make archival or back-up copies of the HP Software, provided each copy contains all the original HP Software’s proprietary notices and is used only for back-up purposes.

3. UPGRADES. To Use HP Software provided by HP as an upgrade, update, or supplement (collectively "Upgrade"), you must first be licensed for the original HP Software identified by HP as eligible for the Upgrade. To the extent the Upgrade supersedes the original HP Software, you may no longer use such HP Software. This EULA applies to each Upgrade unless HP provides other terms with the Upgrade. In case of a conflict between this EULA and such other terms, the other terms will prevail.

4. TRANSFER.

   a. Third Party Transfer. The initial end user of the HP Software may make a one-time transfer of the HP Software to another end user. Any transfer will include all component parts, media, User Documentation, this EULA, and if applicable, the Certificate of Authenticity. The transfer may not be
an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the transferred Software will agree to this EULA. Upon transfer of the HP Software, your license is automatically terminated.

b. Restrictions. You may not rent, lease or lend the HP Software or Use the HP Software for commercial timesharing or bureau use. You may not sublicense, assign or otherwise transfer the HP Software except as expressly provided in this EULA.

5. PROPRIETARY RIGHTS. All intellectual property rights in the Software and User Documentation are owned by HP or its suppliers and are protected by law, including applicable copyright, trade secret, patent, and trademark laws. You will not remove any product identification, copyright notice, or proprietary restriction from the Software.

6. LIMITATION ON REVERSE ENGINEERING. You may not reverse engineer, decompile, or disassemble the HP Software, except and only to the extent that the right to do so is allowed under applicable law.

7. CONSENT TO USE OF DATA. HP and its affiliates may collect and use technical information you provide in relation to (i) your Use of the Software or the HP Product, or (ii) the provision of support services related to the Software or the HP Product. All such information will be subject to HP’s privacy policy. HP will not use such information in a form that personally identifies you except to the extent necessary to enhance your Use or provide support services.

8. LIMITATION OF LIABILITY. Notwithstanding any damages that you might incur, the entire liability of HP and its suppliers under this EULA and your exclusive remedy under this EULA will be limited to the greater of the amount actually paid by you for the Product or U.S. $5.00. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING DAMAGES FOR LOST PROFITS, LOST DATA, BUSINESS INTERRUPTION, PERSONAL INJURY, OR LOSS OF PRIVACY) RELATED IN ANY WAY TO THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF HP OR ANY SUPPLIER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND EVEN IF THE ABOVE REMEDY FAILS OF ITS ESSENTIAL PURPOSE. Some states or other jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

9. U.S. GOVERNMENT CUSTOMERS. If you are a U.S. Government entity, then consistent with FAR 12.211 and FAR 12.212, Commercial Computer Software, Computer Software Documentation, and Technical Data for Commercial Items are licensed under the applicable HP commercial license agreement.

10. COMPLIANCE WITH EXPORT LAWS. You will comply with all laws, rules, and regulations (i) applicable to the export or import of the Software, or (ii) restricting the Use of the Software, including any restrictions on nuclear, chemical, or biological weapons proliferation.

11. RESERVATION OF RIGHTS. HP and its suppliers reserve all rights not expressly granted to you in this EULA.

(c) 2007 Hewlett-Packard Development Company, L.P.

Repack the product

If HP Customer Care determines that your product needs to be returned to HP for repair, follow these steps to repack the product before shipping it.

⚠️ **CAUTION:** Shipping damage as a result of inadequate packing is the customer’s responsibility.

1. Remove and retain the print cartridge.

⚠️ **CAUTION:** It is extremely important to remove the print cartridge before shipping the product. A print cartridge that remains in the product during shipping can leak and cover the product engine and other parts with toner.

   To prevent damage to the print cartridge, avoid touching the roller on it, and store the print cartridge in its original packing material or so that it is not exposed to light.

2. Remove and retain the power cable, interface cable, and optional accessories, such as an EIO card.

3. If possible, include print samples and 50 to 100 sheets of paper or other print media that did not print correctly.

4. In the U.S., call HP Customer Care to request new packing material. In other areas, use the original packing material, if possible. Hewlett-Packard recommends insuring the equipment for shipment.

C Regulatory information

- FCC regulations
- Environmental product stewardship program
- Declaration of conformity
- Certificate of Volatility
- Safety statements
- Additional statements for telecom (fax) products
FCC regulations

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If this equipment is not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase separation between equipment and receiver.
- Connect equipment to an outlet on a circuit different from that to which the receiver is located.
- Consult your dealer or an experienced radio/TV technician.

**NOTE:** Any changes or modifications to the printer that are not expressly approved by HP could void the user’s authority to operate this equipment.

Use of a shielded interface cable is required to comply with the Class B limits of Part 15 of FCC rules.
Environmental product stewardship program

Protecting the environment

Hewlett-Packard Company is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment.

Ozone production

This product generates no appreciable ozone gas (O₃).

Power consumption

Power usage drops significantly while in Ready or Sleep mode, which saves natural resources and saves money without affecting the high performance of this product. Hewlett-Packard printing and imaging equipment marked with the ENERGY STAR® logo is qualified to the U.S. Environmental Protection Agency's ENERGY STAR specifications for imaging equipment. The following mark will appear on ENERGY STAR qualified imaging products:

![ENERGY STAR](https://example.com/energy-star-icon)

Additional ENERGY STAR qualified imaging product model information is listed at:

www.hp.com/go/energystar

Toner consumption

EconoMode uses less toner, which might extend the life of the print cartridge.

Paper use

This product's manual/automatic duplex feature (two-sided printing) and N-up printing (multiple pages printed on one page) capability can reduce paper usage and the resulting demands on natural resources.

Plastics

Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product’s life.

HP LaserJet print supplies

It's easy to return and recycle your HP LaserJet print cartridges after use—free of charge—with HP Planet Partners. Multilingual program information and instructions are included in every new HP LaserJet print cartridge and supplies package. You help reduce the toll on the environment further when you return multiple cartridges together rather than separately.

HP is committed to providing inventive, high-quality products and services that are environmentally sound, from product design and manufacturing to distribution, customer use and recycling. When you
participate in the HP Planet Partners program, we ensure your HP LaserJet print cartridges are recycled properly, processing them to recover plastics and metals for new products and diverting millions of tons of waste from landfills. Since this cartridge is being recycled and used in new materials, it will not be returned to you. Thank you for being environmentally responsible!

**NOTE:** Use the return label to return original HP LaserJet print cartridges only. Please do not use this label for HP inkjet cartridges, non-HP cartridges, refilled or remanufactured cartridges or warranty returns. For information about recycling your HP inkjet cartridges please go to [http://www.hp.com/recycle](http://www.hp.com/recycle).

Return and recycling instructions

**United States and Puerto Rico**

The enclosed label in the HP LaserJet toner cartridge box is for the return and recycling of one or more HP LaserJet print cartridges after use. Please follow the applicable instructions below.

**Multiple returns (more than one cartridge)**

1. Package each HP LaserJet print cartridge in its original box and bag.
2. Tape the boxes together using strapping or packaging tape. The package can weigh up to 31 kg (70 lb).
3. Use a single pre-paid shipping label.

**OR**

1. Use your own suitable box, or request a free bulk collection box from [www.hp.com/recycle](http://www.hp.com/recycle) or 1-800-340-2445 (holds up to 31 kg (70 lb) of HP LaserJet print cartridges).
2. Use a single pre-paid shipping label.

**Single returns**

1. Package the HP LaserJet print cartridge in its original bag and box.
2. Place the shipping label on the front of the box.

**Shipping**

For all HP LaserJet print cartridge recycling returns, give the package to UPS during your next delivery or pickup, or take it to an authorized UPS drop-off center. For the location of your local UPS drop-off center, call 1-800-PICKUPS or visit [www.ups.com](http://www.ups.com). If you are returning via USPS label, give the package to a U.S. Postal Service carrier or drop off at a U.S. Postal Service Office. For more information, or to order additional labels or boxes for bulk returns, visit [www.hp.com/recycle](http://www.hp.com/recycle) or call 1-800-340-2445. Requested UPS pickup will be charged normal pickup rates. Information subject to change without notice.

**Residents of Alaska and Hawaii**

Do not use the UPS label. Call 1-800-340-2445 for information and instructions. The U.S. Postal Service provides no-cost cartridge return transportation services under an arrangement with HP for Alaska and Hawaii.
Non-U.S. returns

To participate in HP Planet Partners return and recycling program, just follow the simple directions in the recycling guide (found inside the packaging of your new product supply item) or visit www.hp.com/recycle. Select your country/region for information on how to return your HP LaserJet printing supplies.

Paper

This product is capable of using recycled papers when the paper meets the guidelines outlined in the HP LaserJet Printer Family Print Media Guide. This product is suitable for the use of recycled paper according to EN12281:2002.

Material restrictions

This HP product does not contain added mercury.

This HP product contains a battery that might require special handling at end-of-life. The batteries contained in or supplied by Hewlett-Packard for this product include the following:

<table>
<thead>
<tr>

For recycling information, you can go to www.hp.com/recycle, or contact your local authorities or the Electronics Industries Alliance: www.eiae.org.

Disposal of waste equipment by users in private households in the European Union

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.
Chemical substances

HP is committed to providing our customers with information about the chemical substances in our products as needed to comply with legal requirements such as REACH (Regulation EC No 1907/2006 of the European Parliament and the Council). A chemical information report for this product can be found at: www.hp.com/go/reach.

Material Safety Data Sheet (MSDS)

Material Safety Data Sheets (MSDS) for supplies containing chemical substances (for example, toner) can be obtained by accessing the HP Web site at www.hp.com/go/msds or www.hp.com/hpinfo/community/environment/productinfo/safety.

For more information

Safety statements

Laser safety

The Center for Devices and Radiological Health (CDRH) of the U.S. Food and Drug Administration has implemented regulations for laser products manufactured since August 1, 1976. Compliance is mandatory for products marketed in the United States. The device is certified as a “Class 1” laser product under the U.S. Department of Health and Human Services (DHHS) Radiation Performance Standard according to the Radiation Control for Health and Safety Act of 1968. Since radiation emitted inside the device is completely confined within protective housings and external covers, the laser beam cannot escape during any phase of normal user operation.

⚠️ **WARNING!** Using controls, making adjustments, or performing procedures other than those specified in this user guide may result in exposure to hazardous radiation.

Canadian DOC regulations

Complies with Canadian EMC Class B requirements.

« Conforme à la classe B des normes canadiennes de compatibilité électromagnétiques. « CEM ». »

VCCI statement (Japan)

この装置は、情報処理装置等電波障害自主規制協議会（VCCI）の基準に基づくクラスB情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。

取扱説明書に従って正しい取り扱いをして下さい。

Power cord instructions

Make sure your power source is adequate for the product voltage rating. The voltage rating is on the product label. The product uses either 110-127 Vac or 220-240 Vac and 50/60 Hz.

Connect the power cord between the product and a grounded AC outlet.

⚠️ **CAUTION:** To prevent damage to the product, use only the power cord that is provided with the product.

**Restriction on Hazardous Substances statement (Turkey)**

Türkiye Cumhuriyeti: EEE Yönetmeliğine Uygundur
Additional statements for telecom (fax) products

EU Statement for Telecom Operation

This product is intended to be connected to the analog Public Switched Telecommunication Networks (PSTN) of European Economic Area (EEA) countries/regions.

It meets requirements of EU R&TTE Directive 1999/5/EC (Annex II) and carries appropriate CE conformity marking.

For more details see Declaration of Conformity issued by the manufacturer in another section of this manual.

However due to differences between individual national PSTNs the product may not guarantee unconditional assurance of successful operation on every PSTN termination point. Network compatibility depends on the correct setting being selected by the customer in preparation of its connection to the PSTN. Please follow the instructions provided in the user manual.

If you experience network compatibility issues, please contact your equipment supplier or Hewlett-Packard help desk in the country/region of operation.

Connecting to a PSTN termination point may be the subject of additional requirements set out by the local PSTN operator.

New Zealand Telecom Statements

The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom’s network services.

This equipment may not provide for the effective hand-over of a call to another device connected to the same line.

This equipment shall not be set up to make automatic calls to the Telecom “111” Emergency Service.

This product has not been tested to ensure compatibility with the FaxAbility distinctive ring service for New Zealand.

Additional FCC statement for telecom products (US)

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the back of this equipment is a label that contains, among other information, a product identifier in the format US:AAAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

The REN is used to determine the quantity of devices, which may be connected to the telephone line. Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all, areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to the line, as determined by the total RENs, contact the telephone company to determine the maximum REN for the calling area.

This equipment uses the following USOC jacks: RJ11C.
An FCC-compliant telephone cord and modular plug is provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack, which is Part 68 compliant. This equipment cannot be used on telephone company-provided coin service. Connection to Party Line Service is subject to state tariffs.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications in order to maintain uninterrupted service.

If trouble is experienced with this equipment, please see the numbers in this manual for repair and (or) warranty information. If the trouble is causing harm to the telephone network, the telephone company may request you remove the equipment from the network until the problem is resolved.

The customer can do the following repairs: Replace any original equipment that came with the device. This includes the print cartridge, the supports for trays and bins, the power cord, and the telephone cord. It is recommended that the customer install an AC surge arrester in the AC outlet to which this device is connected. This is to avoid damage to the equipment caused by local lightning strikes and other electrical surges.

**Telephone Consumer Protection Act (US)**

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains, in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business, other entity, or individual sending the message and the telephone number of the sending machine or such business, or other entity, or individual. (The telephone number provided cannot be a 900 number or any other number for which charges exceed local or long distance transmission charges).

**Industry Canada CS-03 requirements**

**Notice:** The Industry Canada label identifies certified equipment. This certification means the equipment meets certain telecommunications network protective, operational, and safety requirements as prescribed in the appropriate Terminal Equipment Technical Requirement document(s). The Department does not guarantee the equipment will operate to the user’s satisfaction. Before installing this equipment, users should ensure that it is permissible for the equipment to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment. Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines, and internal metallic water pipe system, if present, are connected together. This precaution can be particularly important in rural areas.

⚠️ **CAUTION:** Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate. The Ringer Equivalence Number (REN) of this device is 0.0.
Notice: The Ringer Equivalence Number (REN) assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Number of all the devices does not exceed five (5.0). The standard connecting arrangement code (telephone jack type) for equipment with direct connections to the telephone network is CA11A.
